INTISARI

Penelitian berikut dimaksudkan guna memverifikasi dan mengevaluasi hubungan antara Dukungan Sosial terhadap *Student Engagement*. Ditentukan bahwa sampel penelitiannya yakni 177 mahasiswa Universitas Prima Indonesia melalui teknik *purposive sampling*. Perolehan data penelitiannya berasal dari skala Dukungan Sosial yang mencakup 33 aitem serta skala *Student Engagement* mencakup 33 aitem. Metodologi korelasi *Person Product Moment* dipergunakan dalam menganalisis datanya. Penelitian menunjukkan bahwa dukungan sosial mempunyai dampak yang positif serta adanya hubungan signifikan antara *Student Engagement* yakni korelasi koefisien sejumlah 0.212 yang nilai signifikansinya sejumlah 0.003 ($p < 0.005$) dengan berarti semakin tingginya Dukungan Sosial yang diterima baik dari orangtua, dosen maupun teman-teman maka makin tinggi juga *Student Engagement* mahasiswa serta berlaku sebaliknya.

Kata Kunci : Dukungan Sosial, *Student Engagement*, Mahasiswa yang sedang menyusun skripsi

THE RELATIONSHIP BETWEEN SOCIAL SUPPORT AND STUDENT ENGAGEMENT IN STUDENTS THAT PREPARATING THESIS

ABSTRACT

The following research has a purpose to prove and authenticate the relationship between Social Support and Student Engagement. The research specimen of this research involved 177 students of Prima Indonesia University using a purposive sampling method. This study's data revealed collected utilizing a Social Support scale comprising of 33 items and the Student Engagement scale consisting of 33 items. Data assessment was performed with Pearson Product Moment correlation. The outcomes exhibit that Social Support has a positive impact and has a significant relationship between Student Engagement, through a correlation coefficient of 0.212 with a significance value of 0.003 ($p < 0.005$), meaning that the higher the Social Support provided by parents, lecturers and friends, the higher the Student Engagement of students and vice versa.
