

Amazon Associates Web Service

Version 2008-08-19

Quick Reference Card

Parameter types are strings unless otherwise noted. All parameters that contain "Id" require a valid ID. All parameters that contain "seconds" are of type non-negative integer. (D) stands for "default." All operations use a common set of input parameters listed at the bottom of the page. All results include the Results response group by default. Parentheses contain either constraints or data types. "DG" stands for the *Amazon Associates Web Service Developer Guide API Reference*. "RG" stands for response group.

Operation	Required Parameters	Optional Parameters	Response Groups
BrowseNodeLookup	BrowseNodeId	None	BrowseNodeInfo (D), MostGifted, MostWishedFor, NewReleases, TopSellers
