

Quality Control

UNDIVIDED ATTENTION TO YOUR HOME'S QUALITY

You want a home built to more exacting standards. You also want it ready to move into without unnecessary down time.

BC Stone Homes does both. We have separate, dedicated systems for Quality Control and Centralized Scheduling. Our project managers are free to focus on excellence at every stage of the building process. With instant online access to home plans and a quality checklist, they ensure each scheduled task is performed correctly.

Our quality control manager makes regular site inspections. Any task that needs additional attention is noted in a “to-do” and immediately tagged for the subcontractor. **BC Stone Homes** tracks it all in the Builder Trend app.

The result is a custom home built the way we want it—the way *you* want it.
