In the spotlight

New to Bisque, the Balmoral towel radiator is perfect for large, traditional bathrooms.

The Buckingham is an elegantly compact, wall mounted towel rail.

The floor mounted Osbourne is a ball jointed towel rail with timeless style.

To complement our new traditional towel rails is new valve set RM.

A warm welcome

Bisque was founded in 1979 and quickly became a company with a mission - to offer beautiful but practical radiators in the most exciting styles, colours and finishes.

From timeless classics to the latest in energy efficient designs, our radiators can be found in wide variety of locations from The Shard to Highgrove House and our commitment to design, innovation and customer service has seen us regularly win awards, including CoolBrands and the BKU Award for Best Heating Brand.

Over the years we have worked with both established designers and up and coming new talent to find the most innovative designs but no matter what the style, good design and quality are paramount. We remain driven by enthusiastic people who understand how much beautiful radiators can transform interiors.

On our website you will find even more inspirational imagery, together with handy tools such as our easy-to-use heatloss calculator, installation guides and our unique colour and valve selector tool, which allows you to see every stock model in every available finish and with complementary valves. You can also order free colour samples so that you can be confident that the finish you have chosen is the perfect fit for your home.

"Whether for contemporary or traditional interiors [Bisque] continues to lead the way"
The Observer

"[Bisque]…bringing you luxurious, stylish radiators and adding excitement to the world of heating"
Kitchens, Bedrooms & Bathrooms

Accredited Premium Partner of the Society of British and International Design (SBID)

SBID

BKU AWARDS WINNER Best Heating Brand of the Year 2015

BKU AWARDS WINNER Best Heating Brand of the Year 2016

BKU AWARDS WINNER Best Heating Brand of the Year 2017

We are proud to have won the BKU award for Best Heating Brand for 3 years in a row.

Pinchy is the Bisque mascot. Keep a lookout for him.

How to size a radiator

To establish the heat output required you can consult your plumber or use the Bisque heat loss calculator found on our website. Our sales teams will be happy to assist with any calculations.

We keep over 300 sizes in stock but many radiator styles are also available in a further range of bespoke sizes.

Technical data

Heat outputs listed in the brochure are given in watts and british thermal units (btus). All outputs have been determined according to EN 442 by independent laboratories and are shown at operating temperatures of ΔT= 50K.

Technical information is shown on page 138 of this brochure. Detailled installation information can be found on our website.

All of our products are compliant with European regulations.

Colour and finishes

The majority of our radiators are available from stock in at least 2-3 finishes, which we believe will complement most interiors. However, for many ranges there is a great selection of other options available to order and this is indicated by a colours price under the model listing.

As there is a variety in options between ranges, please consult the Colours section on page 158 to see which radiators are available with which colours and finishes.

Pipe centres

Where models have underside connections we have listed the pipe centres. However please note that these may alter depending on the installation e.g. if a supplementary heater is fitted. Please check carefully before drilling holes in tiles or wood flooring.

Delivery charge

Prices quoted include free delivery to the UK mainland for radiators and towel radiators.

Orders for valves, fans, elements and accessories with a net order value under £100 are subject to a processing charge of £10 + VAT

Warranty

Warranty terms differ according to material and manufacture. The Tetro range has a 15 year warranty and our stainless steel radiators have a 10 year warranty. All other central heating radiators have a 5 year warranty. Radiators with electric heating elements have a 2 year warranty.

Warranties are subject to correct installation to current standards / water treatments and use.

Please see the inside back cover of this brochure for our Terms and Conditions.

Alban

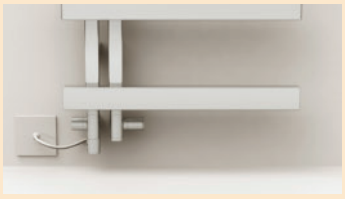

The rectangular version of our popular Chime has the same sparkling appeal but with a perpendicular style. Cantilevered rails allow for even the plumpest towels to be easily slid on and off. Great for family bathrooms, the Alban can be installed with the rails to the left or right.

Have you considered...

Electric models

Rails supplied as standard with non-adjustable thermostat. Please allow 100 mm beneath the rail for the flex.
See page 154.

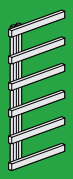

Supplementary Heater Connection

Electric BTH thermostat supplied in chrome to match rail.

***pipe centres may be affected.**

Balmoral

The Balmoral is the perfect radiator for large, vintage bathrooms as it will both heat the space and keep your towels warm and dry. This Victorian style, ball jointed towel rail comes with a beautiful chrome finish but can also be ordered in a range of fabulous finishes including nickel, brass and antique bronze.

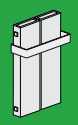

Blok towel

Calm and chic, the Blok towel radiator complements the clean lines of modern bathrooms and kitchens. Compact and with a good heat output, this energy efficient radiator is suitable for both large and small spaces.

Lissett towel

The big sister of our popular Svelte, this radiator has the same graceful style but with a larger heat output and more space for towels, making it a great choice for family bathrooms. The rail is made from highly polished aluminium and allows plenty of space for sumptuous towels.

Model LIT-60-40 is designed for cloakrooms and comes with a narrower rail so it can fit into small spaces.

Olga

This elegant, stainless steel towel rail can be installed on the hot water system, so that towels will remain warm and dry even when the central heating system is turned off. The narrower widths are great for small bathrooms and cloakrooms.

Have you considered...

A set of compact, manual valves are included with the radiator. When ordering, please specify if pipe connections are to the wall or the floor.

Thermostatic Control (optional upgrade)
chrome: £23 £27.60

For improved energy efficiency, upgrade to a thermostatic head.

Tetro towel

The graceful embossed pattern on this aluminium radiator has been designed to complement traditional bathrooms and kitchens. The rail is both elegant and practical – made from polished aluminium it can be fixed from either side. With high outputs, the Tetro towel is especially suitable for large bathrooms or small cloakrooms which require a lot of heat.

As each radiator is individually etched, the surface pattern and tones can vary greatly from one model to another.

VOGUE FASHION
HOUSES
DAVID BAILEY

Blok

A sophisticated radiator which combines stylish Italian design with energy efficient technology. The Blok's neat columns, complemented by elegant chrome caps, make it an ideal companion for contemporary interiors. Made from aluminium it uses less energy to heat up and is fast to respond to changes in room temperature.

Blok

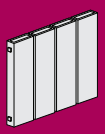

The Blok is available to order in four elegant finishes: champagne, marron, nickel and white sable

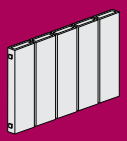

Other finishes are available for this product via our colour matching service - see page 158.

- all models have side connections

Have you considered...

For pipes from wall we recommend **valve set L**
see page 152.

Classic

Timeless and versatile, this radiator is a sleek update of an old school favourite. Whether modern or traditional, tall or short, subtle or bold, our Classic looks great in every insallation.

Classic

We stock a significant range of sizes and finishes of this versatile radiator but there are many additional made-to-order options available, from fabulous colours to bespoke curved and angled models for bay windows.

Further details can be found on our website or by contacting our customer services team.

With over 2000 bespoke sizes and a unique colour matching service (see p158) we can help you find the perfect fit for your home.

New rose copper finish (see page 159).

Matt black finish available to order.

Have you considered...

The radiator is operated by a wireless, digital remote controller (wall mountable) with easy-to-use programs.

The controller communicates with a receiver discretely mounted on the back of the Classic and colour matched to the radiator.

Further details can be found on our website.

Have you considered...

The radiator is operated by a wireless, digital remote controller (wall mountable) with easy-to-use programs.

The controller communicates with a receiver discretely mounted on the back of the Classic and colour matched to the radiator.

Further details can be found on our website.

Decorative panel

Outrageously daring or discreetly subtle, the Decorative panel's glossy good looks provide a practical heating solution for every room in the house.

Lissett

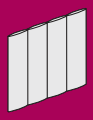

With its slim profile and graceful curves the Lissett is a subtlety elegant radiator that complements contemporary interiors. It's elliptical sections are topped by chrome caps and it's discreet brackets allow for minimal projection from the wall. Made from recycled aluminium, the Lissett uses less energy to heat-up and is fast to respond to changes in room temperature.

Lissett

The Lissett is available from stock in white (RAL 9010) and volcanic but can be ordered in a range of finishes. Other colours are available via our colour matching service (see page 158)

Tetro

The gorgeous Tetro combines all the benefits of aluminium radiators with beautiful retro styling. Made from recycled material, this innovative model is high tech but with classic appeal. Light and responsive and with a high output, this is a radiator for the future which complements the past.

Tetro

The Tetro comes with an impressive 15 year warranty and is available in 4 elegant colours, White (RAL9010), Volcanic, Champagne and Marron.

With its slim profile and high output, the Tetro is both effective and unobtrustive.

Have you considered...

For pipes from wall we recommend **valve set L** see page 152.

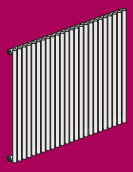

For pipes from floor or wall we recommend **valve set N** available in matching volcanic or complementary brass finish. See page 152.

Trubi

Elegant yet simple, the Trubi will complement any interior. The slender, vertical tubes are attentively spaced to give this radiator a light and subtle appearance, which belies its good heat output. Tall models provide a solution for narrow wall spaces whilst the low version fits effortlessly in hallways and under windows.

we recommend **valve set J**
see page 151.

Technical data

The mandatory introduction of CE marking for radiators means that all radiators should now be independently tested and their outputs certified by an independently accredited third party in accordance with European standard EN 442. This information (including weight, water content and the testing facility) must be shown in the literature and on the packaging.

Bisque has always been scrupulous in ensuring that all radiators in our portfolio are independently tested before we launch them and the required information has always been available via the technical data sheets on our website. In accordance with the new CE guidelines, we have now also included this information in our brochure and on the radiator packaging. We can also provide Declaration of Performance documents on request.

Customers can therefore be assured that Bisque radiators will perform as published and need have no concerns about under heated rooms due to exaggerated radiator outputs.

Valves

Bisque radiators are as much about good looks as good performance. As standard radiator valves can often be ugly or obtrusive, we have chosen a range of discreet, well designed, top quality valves from Europe's leading manufacturers to complement our radiators.

There are two types of valves:
Manual valves have no labelled settings - simply turn the valve head until the radiator is giving out the amount of heat desired. They are most suitable for areas where your heating needs are fairly constant e.g. with towel rails, or where the preference is for a more subtle and discreet appearance.

Thermostatic valves come with an in-built temperature sensor and have a range of temperature settings.
The thermostatic valves will maintain the room at the temperature you have selected by automatically adjusting the heat output from the radiator. This means that you can take advantage of any "free" heat the room receives, such as that from the sun or from electrical equipment. Thermostatic valves are also useful for rooms that may have sudden large changes in occupancy e.g. dining rooms.

Installation
When deciding which valve set to use you will need to consider where the heating pipes are coming from i.e. the wall or the floor. The tables on the following pages indicate which of our valves sets are suitable for each option. All our valve sets have standard 15mm connections.

Where possible, we would always recommend chasing the pipework into the wall (as you would with electric cables) so that the final installation is as attractive as possible. Long, spindly lengths of pipework can often mar the final look.

Thermostatic valve heads should always be installed with the heads pointing upwards or to the side (as with straight or double angled valves). If they are installed with the heads pointing down, they will not work correctly and will need to be replaced.

+VAT

chrome: £185 £222.00

VALVE SET VL dual fuel thermostatic left hand flow

chrome

Designed to be used with supplementary heaters when connections are from the wall. The element and valve are integrated into one neat unit.

+VAT

chrome: £185 £222.00

Thermostatic valve heads should always be installed with the heads pointing upwards or to the side (as with straight or double angled valves). If they are installed with heads pointing down they will not work properly and will need to be replaced.

Supplementary heaters

Supplementary electric heaters are designed to heat towel radiators when the central heating is turned off in the summer months and there is still the need for warm, dry towels.

Our standard supplementary heater, BTH, is non-adjustable. (Note: the maximum operating pressure for these heaters is 4bar)

Installation of a supplementary heater will affect the valve selection and pipe centres. We recommend the installation shown as a neat option for Bisque towel radiators but depending on the location of your pipework, you may need to discuss other options with your plumber.

Supplementary heater **BTH** with valve set VR

Supplementary heater **BTH** with valve set D

Electric heaters for towel radiators

We have two types of electric heaters available with our towel radiators.

Our Alban, Chime and Pera radiators are available with a specially designed, non-adjustable heater, which has a neat integrated on/off switch at the bottom.

All other electric towel radiators come with our standard non-adjustable heater, which has a white or chrome cap to complement the radiator finish. This heater can be used with our cable cover (see next page) for a neat installation.

Please note: as the majority of our electric towel radiators come factory fitted, it is not possible to swap the element types.

Heater cable cover

+VAT

SHECB chrome: £51 £61.20

Our cable cover has been designed for use with our standard electric heater. This neat chrome cover hides the cable attached to the heater. It can be used with all electric towel radiators except the Archibald, Alban, Chime and Pera. The cable cover can also be used with supplementary heaters.

Matching pipe and shroud

PK-30 available in white (RAL 9016) / satin chrome / chrome / nickel nero: £26 +VAT £31.20

Two 300 mm long painted or chromed brass pipes with two matching shrouds. The pipes are fitted direct to the valve and can then be connected to main copper heating pipework below the floor boards. The shrouds cannot be used with radiators which have 50mm pipe centres.

Deluxe air vents

All central heating radiators are supplied with standard air vents which are included in the price.

Bisque's Deluxe air vents have a very stylish appearance to complement the radiator. Simply push the vent to remove the air from your radiator – no air vent key required.

All models of Finn are now supplied with these new air vents in matching finishes (included in the price).

The Deluxe air vent is available to purchase with other radiators.

Colours and special finishes

The majority of our radiators are available from stock in at least 2-3 finishes, which we believe will complement most interiors. However, there are a wide range of other options available to order.

Our most popular colours and finishes are shown on pages 164 –165. To see which radiators are available in different colours and finishes please consult the tables on the following pages. If your preferred finish is not shown, we can arrange for some radiator models to be painted in a wide range of RAL or NCS colours (**price available on application**). This is only possible for ranges which show a ▲ in the colours column on the tables.

Colour matching service

We offer a unique colour matching service which allows you to match your radiators to popular paint ranges such as Farrow & Ball, Little Greene and Dulux. We can also match to other items such as wallpapers and kitchen cabinets. Please see the video on our website for inspiration.

All we require is a sample of the colour you want and we can then advise the closest match. There will be a small charge (< £10) to organise each proof but you can then be happy you have the precise colour.

Please see the tables on page 162-163 to see which radiator ranges can be colour matched. Prices are available on application as it varies depending on product and colour. Please allow 6 - 8 weeks for delivery.

Exceptional finishes

For our Classic range, we have developed some especially striking special finishes, which are hand applied with minute care. Please contact us for samples and prices.

Our organic rustique finish is not simply a paint effect but is achieved by means of genuine oxidation. Iron metal is sprayed over a base coat after which a water solution is applied to produce the rust patina. This means that every radiator will be bespoke with a unique pattern.

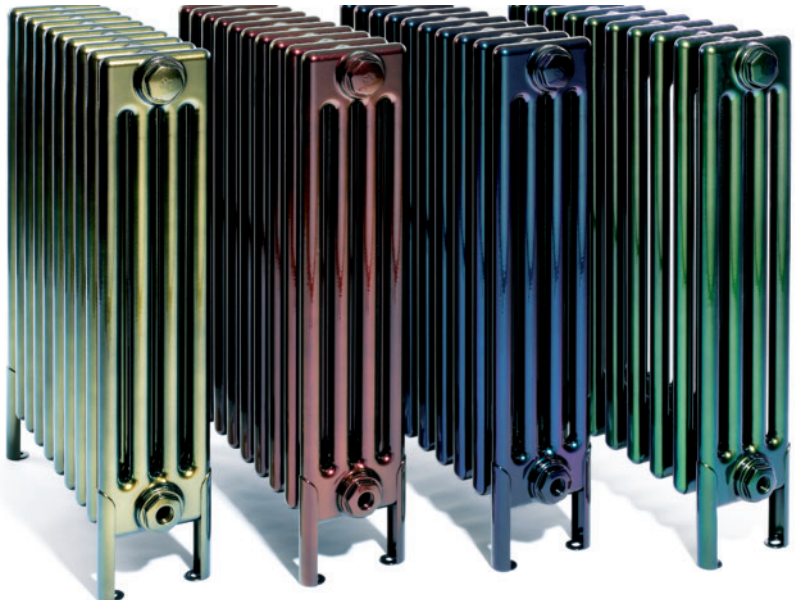

The gorgeous rose copper finish contains genuine copper but is overlaid with a matt lacquer which prevents further tarnishing, whilst still maintaining the beautiful glow.

Below are our are striking two-tone Iridescent colours
left to right: oyster, gold to silver, red to gold, purple to green and green to silver.

Classic in lacquered bare metal

This ever popular and exciting finish exposes the manufacturing marks that occur in the production of the radiator. Part of this industrial appeal is the lack of uniformity and regularity, as each model will be slightly different and therefore unique.

However, it is possible to identify some common effects, depending on the width or height of the radiator, due to the different manufacturing techniques used.

When considering stock sizes of Classics it is helpful to note the following;

Our wall mounted Classic radiators are 2 columns wide. The manufacturing process for these changed in 2016 and the top of the radiator now have a more neutral and uniform appearance similar to our 4-column and 3-colum models.

Our floor mounted Classics are 4 columns wide. Models stocked in the lacquered bare metal finish are over 475mm high and will typically look as shown below. Note that the top of the radiator is quite uniform and light in colour.

For sizes outside of the stock range the following variations should be considered.

The manufacturing of the 3 column Classic, equal or over 400mm in height, has now changed and the finish will look similar to that of the 4-column model.

For radiators under 400mm in height (excl feet), the column will have a strong appearance with darker welding marks near the top and bottom. Those equal or over 400mm in height (excl feet) will have a much lighter, more uniform appearance.

Whilst the above should help to give a guide to some of the varieties in finish, we would advise that other differences could occur and that the beauty of this product is in its unique, industrial appearance.

Colours and special finishes

Please note: due to the limitations of the printing process, the colours shown here are not exact representations. If you wish to order a radiator in one of these colours, please ask to see our separate colour chart or ask for a sample before placing your order (samples can be ordered via our website).

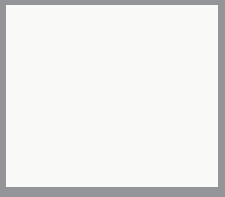

White

Traffic White is a brilliant white designed to complement the finish of modern sanitaryware. Pure White is softer, and usually preferred for rooms other than bathrooms where Traffic White is considered too harsh. White Quartz and Matt White bring a contemporary, textured finish to interiors.

Terms and Conditions of Trading

A complete copy of the company's terms and conditions of trading are available on our website www.bisque.co.uk

Please note the following:

- All delivery times quoted are estimates only.
- Returned goods for credit will only be accepted by prior arrangement (confirmed in writing), within 8 weeks of the date of despatch, where the goods are part of our stock range and where the goods are as fit for sale on their return as they were on delivery. If goods have been fitted this is deemed as acceptance of their quality. We cannot accept the return of non-stock goods.
- Where a radiator is returned as no longer required and an alternative radiator is not ordered a 25% restocking fee plus a £10 administration fee will be charged. If a radiator is no longer required but an alternative radiator is ordered, either a restocking fee of £25 or 25% of the value (whichever is the lower) will be charged, but the administration fee of £10 will be waived.
- Radiators with steel components (other than stainless steel) must not be installed on a domestic hot water circuit. If a stainless steel or brass product is to be installed on the domestic hot water circuit, a check should be made with the local water authority to ensure that dezincification is not a common occurrence.
- Artificially softened water should not be used to fill radiators. For FAQ radiator/water-related information, visit www.fernox.com
- You are responsible for ensuring the suitability, conformity and interoperability of the goods or indicative system design suggestions provided by us, with your heating system and your design requirements. It is important that you undertake such verification with an appropriately qualified expert third party.
- All measurements given in this brochure are nominal dimensions only.
- All brochures, catalogues and other promotional materials are to be treated as illustrative only. Their contents form no part of any contract between us and you should not rely on them in entering into any contract with us. Any typographical, clerical or other error or omission in any literature, quotation, price list, or other document issued by us will be subject to correction without liability being incurred by us.
