England Park Raceway

Located at the Moreton Bay Regional Council, England Park Raceway is in Brendale, an industrial suburb about 30 minutes to the north of the centre of Brisbane, and about 35 minutes from the Brisbane airport.

The street address is corner of Leitch's Rd and Strathwyn St., Brendale, Qld, Australia.

The track has been built on a council park with the land kindly donated by the Moreton Bay Regional Council. This facility was funded and built by the members of the Queensland Radio Circuit Car Racing Association along with the generous support of the council and local business.

The track has a reputation of being a high speed track and although speed and power are important, many have underestimated its tight infield and high speed sweeper.

The drivers' rostrum is over 3 meters high with an unobstructed view of the entire track area. There is a dedicated engine run in area, tyre truing. Up to 100 pit spaces and chairs for competitors.

Accommodation Information

Alfa Accommodation of Aspley	(07) 3263 4011
Aspley Motor Inn	(07) 3263 5400
Aspley Pioneer Motel	(07) 3263 6122
Carseldine Court Motel	(07) 3263 5988

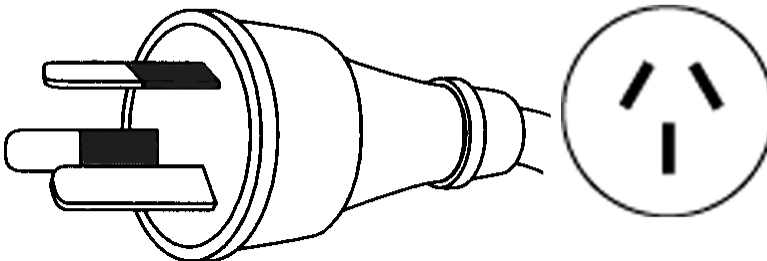

Fuel Supplies

To be confirm on fuel brands, most likely Runnertime and VP.

Track sponsor SpeedyRC will be available on site with fuel and tyres for sale.

Domestic Power Supply

In the covered “**Paddock**” Area there is 220 - 240v / 50 Hz domestic power. An Australian 3 pin grounded plug (see picture) is used throughout. There is also 12-volt power available at the tyre truing area. The easiest way is to arrange for these adapters is prior to your departure in your own country though we will have a supply of adapters available for sale at the event.

The diagram above indicates the shape of an Australian domestic power plug, this type of plug is unique to Australia. Ensure that your equipment is also able to handle the lower cyclic rate of 50 Hz, most 240v countries are at 60Hz. Generally, this is only a problem with electric clocks and things of this nature.
