Re: Special Education/Typical Student Preschool Capacity Needs (Exhibit 4)

Date: June 1, 2009

---

In order to accommodate the inclusion of the special education students in the District's Special Education Preschool Program with typical peers, it has been determined that the District's Employee Child Care/Preschool Program should be merged with the District's Special Education Preschool Program.

Additionally, the District Employee Child Care Program would need facilities to accommodate the infant/toddler program currently offered at the Shores.

A total of 22 classrooms, as listed below, are needed to successfully meet the needs of the students enrolled.

- 18 Classrooms (16 for Preschool and 2 for Child Care)
- 1 Occupational Therapy/Adapted Physical Education
- 1 Speech Room (divided in half to equal 2 rooms)
- 1 Meeting Room (divided in half to equal 2 rooms)
- 1 Assessment Room/Office (divided in half to equal 2 rooms)
