**New Profit Inc.**

New Profit exists to help visionary social entrepreneurs and their organizations bring about widespread and transformative impact on critical social problems. We work to fulfill this mission with two approaches: 1) providing multi-year financial and strategic support to selected social entrepreneurs and their organizations, and 2) helping to build an environment that enables all social entrepreneurs and their organizations to create widespread, transformative impact. New Profit believes that just as entrepreneurship and invention have enabled our nation to create a productive, vibrant economy, so too can we harness America's spirit of innovation, vision, and optimism to help solve our most pressing social problems.

With the support of individual investors and our signature partner, Monitor Group, New Profit works with a portfolio of social entrepreneurs tackling persistent social problems in education, workforce development, public health, and other areas. In addition, we bring together social innovators from across sectors at the annual *Gathering of Leaders*, and also drive other initiatives to release the potential of social entrepreneurship. Included among these is America Forward, a coalition of more than 65 social entrepreneurs and high-impact organizations that have come together to present presidential candidates and policymakers with a new and transformative way to solve the difficult social problems facing our nation.
