### Central Venous Catheter Dressing Change Tray with Tegaderm™ Dressing and Acetone Alcohol Swabsticks

Provides the necessary components, including presaturated swabsticks and ointment, in sequence of use on a sterile field, for maintenance care of central venous catheters. The featured dressing is Tegaderm™, a thin, flexible, transparent, polyurethane film coated with a hypoallergenic, acrylate adhesive.

Contents:

- One tray
- One CSR overwrap
- One mask
- One pair gloves
- One povidone iodine ointment
- Three acetone alcohol swabsticks
- Three iodophor PVP swabsticks
- One 4" x 4" gauze dressing
- One 2" x 2" non-woven split dressing
- One 2" x 2" non-adhering dressing
- One 2" x 2" gauze dressing
- One 4" x 5" Tegaderm™ transparent dressing
- One roll medical tape
- One dressing change label

**CATALOG NO. 833**

*Packed 30 trays/carton*

### Central Venous Catheter Dressing Change Kit with Tegaderm™ Dressing and Skin Protectant Swabsticks

Provides the necessary components to streamline maintenance care of the central venous catheter. Components are assembled in sequence of use in a flexible package and include presaturated swabsticks and ointment. The featured dressing is Tegaderm™, a thin, flexible, transparent polyurethane film dressing. Instead of a tray, this kit comes soft packed with a polylined sterile field.

Contents:

- One polylined drape
- One pair gloves
- One iodophor PVP ointment
- Three isopropyl alcohol swabsticks
- Three iodophor PVP swabsticks
- One skin protectant swabstick
- One 2" x 2" non-woven dressing
- One 2" x 2" non-woven split dressing
- One 3" x 3" gauze dressing
- One 4" x 5" Tegaderm™ transparent dressing
- One roll medical tape
- One dressing change label

**CATALOG NO. 832**

*Packed 50 trays/carton*

- One 30cc sodium chloride 0.9%
- One 10cc heparin, 100 u/cc

#### CATALOG NO. 831

*Packed 20 trays/carton*

## CUSTOM KITS

### You pick the tray, we'll make it.

Don't see the tray you're looking for? Then why not custom design your own?

If our standard trays cannot be adapted to your particular procedure, we'd be pleased to custom design and manufacture one to your exact specifications, with the same high quality components found in our standard kits and trays.

With a custom tray, you can also specify the sequential packing of the components for proper aseptic technique and maximum efficiency. And since all components necessary to perform the procedure are prepared for you in a single, pre-sealed, sterile disposable tray, you can cut down on time spent ordering supplies and preparing for the procedure.

Sterile, disposable procedure trays are economical alternatives, saving your facility both time and money...not to mention the added benefit of simplified patient charges.

If you have an interest in exploring custom kit options, ask your Busse representative, or call our Customer Service Department at **(800) 645-6526**. Minimum quantities apply.

In this rapidly evolving environment of health care delivery, Busse is your prime advantage.
