CATALOG NO. 164 – 12 FR

*Packaged Sterile
5 dispenser boxes of 10 each*

Sterile obturator

clears obstructions and allows the malleable shaft to be bent to the desired position without occlusion.

Longer tube

for easier access to hard to reach areas.

Anodized aluminum shaft

provides flexibility during procedures. Available in three sizes: 8FR, 10FR and 12FR for procedure versatility.

Control vent

is conveniently located for continuous or intermittent suctioning.

Ergonomically designed handle

is longer, allowing for better dexterity. The square shape ensures non-slip grip.

Universal connector

facilitates easy connection of tubing.
