Umbilical Cord Clamps and OB Kits

POSI-GRIP™ UMBILICAL CORD CLAMP

ONCE IT'S CLOSED, IT'S LOCKED!

The single-use clamp is designed to seal the umbilical cord, preventing loss of blood as the cord dries beneath it. It can be easily placed with one hand, even if gloved and slippery. The interlocking teeth hold the cord securely and keep it stationary. Once the protected closure is in place and closed, it cannot open accidentally. Works with any style cord cutter.
