The tested model of Hyundai Genesis sedan was introduced in Australia in November 2014 and New Zealand in January 2015. This ANCAP safety rating applies to all variants. Tests were conducted under ANCAP's Niche Vehicle Policy.

Dual frontal, side chest and side head airbags (curtains) for front and rear seats and a driver knee airbag are standard. Autonomous Emergency Braking (AEB), electronic brake distribution (EBD) and electronic stability control (ESC) are also standard. Advanced seat belt reminders are fitted to all seats. A pop-up bonnet provides extra protection for pedestrians.

In the frontal offset crash test, driver chest protection was acceptable. Passenger protection was good. Driver protection was good in the side impact test. Head protection in the side pole test was also good.

## OCCUPANT PROTECTION

### Frontal Offset Test.

Each body region is scored out of 4 points

Head / neck:	4.00 points
Chest:	3.88 points
Upper legs:	4.00 points
Lower legs:	4.00 points

The passenger compartment held its shape well in the frontal offset test. Pedal and steering wheel displacements were well controlled. Driver and passenger contact with the airbags was stable. A knee airbag protected the driver's upper legs. All doors remained closed during the crash. After the crash all doors could be opened with normal effort.

### Side Impact Test.

Each body region is scored out of 4 points

Head:	4.00 points
Chest:	4.00 points
Abdomen:	4.00 points
Pelvis:	4.00 points

Good protection was provided for the driver in the side impact test. The side airbags performed well.

### Pole Test.

Scored out of 2 points

The vehicle was eligible for a side pole test because it has side curtain airbags. The vehicle scored the maximum 2 points for head protection in this test.

### Whiplash Protection Test.

Whiplash protection assessed by IIHS to the RCAR Protocol

Geometric test:	Good
Dynamic test:	Good
Overall whiplash rating:	Good*

## PEDESTRIAN PROTECTION

### Pedestrian Test.

**ACCEPTABLE** - Scored 22.7 out of 36 points

Child and Adult head impacts: 16.7 points  
 Upper leg impacts: 0.0 points  
 Lower leg impacts: 6.0 points

The bonnet had some good results for head protection but most tested points were marginal. The bonnet leading edge was poor. The bumper provided good protection. (v7)

\* For information about the application of ANCAP ratings to model variants see the ANCAP Variant Policy. In brief, ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model.
