

SOLAIA *forte*

BENEFITS AND FEATURES

- DOE OUTPUT 123,000—216,000
- 3-PASS MID MASS EUROPEAN DESIGN, WITH GG20 SILICON INFUSED CAST IRON.
- 20 YEAR WARRANTY
- AVAILABLE WITH
 - BECKETT
 - CALRIN
 - RIELLO
- MULTI FUEL OIL, PROPANE, NATURAL GAS.
- HYDROSTAT 3250
- DIRECT VENT CAPABILITY, 3-4 SECTION BOILERS.
- FULL SWING DOOR FOR EASY SERVICING
- BOILER FULLY PACKAGED
- ENERGY STAR RATINGS

A 3 PASS EUROPEAN DESIGN BOILER W/ COIL. The first of it's kind in the industry.

AVAILABLE ON SOLAIA forte BOILERS

RESPONSIVE HOT WATER TECHNOLOGY

This technology comes standard in our HYDROSTAT 3250. It recognizes a sudden drop in boiler temperature when a no heat call exists. It will automatically fire the boiler prior to reaching the low limit. It is a proactive solution to providing ample hot water production, and increasing your fuel efficiency.

Optional component: SMART H₂O ENERGY MANAGER CONTROL

You have the option to control your boiler to fit your schedule. Other boilers with domestic water coils often run just to maintain temperature on the boiler so that when there is a call for domestic water there is already enough energy in the boiler for the coil demand. Often this can happen in the middle of the night when there really is no need to keep your boiler warm. With the Smart H₂O Energy Manager control you can control your boiler with a WiFi Smart switch. Consult your local installer for information.
