MAYDAY: Air Disaster investigates legendary aviation disasters to find out what went wrong and why. Expertly crafted dramatic re-enactments take the viewer into the very heart of the action while key witness interviews, accident reports, news footage, and state of the art CGI create a blow-by-blow account of events as they unfold. At every stage, we witness the drama in the cockpit, the panic in the cabin, and the tension on the ground. Whether it’s a terrorist attack, fatal human errors, or mechanical failures, the intense human drama combines with hard-hitting scientific explanation to reveal what really happened, and what the airline industry has learned from each disaster.

MAYDAY: Air Disaster is one of the world’s most successful returning factual series. It’s one of National Geographic International’s highest rated series ever and the first four seasons have been licensed to over 30 separate territories worldwide on top of National Geographic International’s footprint of 164 countries.
