## **AUGUST 15, 2015 DIVERSIFYING THE GREEN MOVEMENT**

### **Urban Waterways Community Forum**

This forum aims to bring residents together to explore the traditional image of environmentalists, the assumptions made about communities of color in regards to environmental and sustainability issues, and the truth behind such prejudgments. Do minorities feel represented? Is there a lack of trust between traditional environmentalists and communities of color? How do communities define environmentalism and their relationships to urban waterways? What steps have been taken to make the table more inclusive? What are the possible social and political consequences of such inclusion?
