and our very own DuFAST BUS!  
It's a HANDS-ON experience for the entire family.  
PARENTS MUST ACCOMPANY CHILDREN

### ***Where is my Bus?***

*DuFAST is pleased to announce that you will soon be able to pinpoint the exact location of your bus in real-time. **What do you mean?** Well, DuFAST is investing in an Intelligent Transportation System (ITS). Buses will be equipped with Global Positioning Satellites (GPS). This means your bus will be tracked in real-time. You will be able to track the bus via the internet and/or your cell phone. **What else will the ITS do?** Office staff will be able to obtain up-to-date data instantly. For example, we will know the number of passengers boarding and de-boarding a certain bus stop. **When will the project start and when will we be able to track the buses?** The project has already begun; HOWEVER, you will not be able to track the buses until the project is complete. We expect the project to be completed by early fall 2012.*
