My dear Sir,

I wrote yesterday
in the following letter to Pres. White - but under
the idea that he may be absent on his con-
templated trip to Europe - I take the precaution
of addressing you also on the same subject.

I have just returned from an interview, in
Washington, with the Chairman of ^{the} Military
Committee of the House - Gen. Canfield of
Ohio. The "military education bill" will come up
in a few days - with every prospect of a
favourable issue - the intrinsic importance of the
subject seeming to be fully appreciated - It
is my wish however to bring every possible
influence to bear in aid of measure at the
critical moment which will be on its
introduction in Congress - It is quite possible

That the action of your Board of Trustees may yet
be in time to be of great value in the matter,
particularly if brought promptly to bear upon
the Senators and Representatives of the State
of New York. The object of this communication
is respectfully to suggest such procedure,
in case favorable action upon the "National plan"
is taken by your Board.

Feeling assured of your own patriotic
interests in the subject. I need not apologize
for thus addressing you

I remain Sir

With high respects

Dear Sir

I am reluctant to trouble you; but I do not know how else to obtain the information I seek. In the N. Y. Independent, of Sept. 5. 67, I read an article respecting the Cornell University, and have been induced by it to bring my son, 15 years old, from Oregon, to place him in that Institution. I wish to know if it is now ready to receive pupils, or when it will be, and whether, in the mean time, there is a suitable school in the village or suburbs of Ithaca which the lad can attend until the University is inaugurated, and an ap =

If there is any person
whose province it is to furnish
information respecting the Univer=

to place this letter in his hands?

other documents would be very
acceptable.

Dear Sir:

Herewith you will receive a statement of the Cornell family of Minerva which I have obtained from Mr James G. Cornell. From what I learn of him, his grandfather James Cornell was born in the same place, and it has been in the Cornell family at least 150 years, and probably longer.

There is another Cornell family a member of which is about 80 years of age. I will try and see him shortly.

My dear Sir:

I am glad if you have good reason to believe in the sufficiency of the provision in the proposed amended Constitution, as concerning the land-fund.

You speak of a trustee meeting soon to be held. I have written to see you in private, for a few minutes, in reference to a meeting of your Board.

I am sure that we do not understand each other. At any rate, I am sure that I entertain no desire in respect to my self or my interests, that should give you any uneasiness in respect to me, or suspicion of me.

My conviction is clear of doubt
in respect to the love-growth
which have not been accorded to
me. And I ask only that the
subject may be cordially & fairly
considered.

If you object to a private
interview in reference to it: I
should be glad to see you with
Dr. White & Judge Fildes, or others
whom you might prefer. Or
I should be satisfied to have
the ~~subject~~ subject considered
by a committee of the Board.

I do not wish any thing which
the judgment of cordial men
will not fairly accord me.

As the matter now stands I
am humiliated. I am sure you
are too generous to refuse me
the relief which the cordial judg-

ment of cordial competent men
would afford me. Give me my
witness, that my efforts for you
at Albany, within the limits of 1865-
were purely to secure the inter-
ests of education. In that ef-
fort I did not think of it in
relation to myself at all.

I am glad I made it - & you
that you can be happy to be successful
I Providence believe that I shall
be thrown on a way on a late stage
I shall do my best to put such in-
formation to the arrangement.

Mr. Cornell - Dear Sir

Your letter of the
10th inst I have recd.

I am greatly comforted
by the intelligence you give me,
concerning Cascadilla place;

It gives me also the greatest
satisfaction to know - that
others, & not yourself, have
been engaged in trying to
sell out the "Birth-right" of
the place, "for a mess of pottage"
& thus destroy its future claim
- to the "Blessing" - of either
God or man.

But it is not strange, I
suppose, that when persons
have thus surrendered themselves
to a narrow & purely self-
protecting policy - that they
should like to cast the
reflection of their acts on
some one else. Be this, such
may, I am happy to know
the real facts in the case
& knowing them - I most
decidedly have a proposition
& make you, by which I think
the place can be made
to realize the high ideal
I have always entertained
for it.

I leave tomorrow for
New York - to be absent

about a fortnight, I presume

As soon as possible, on
my return, I will try & see
you - if you are to be found -
& state what I have in mind
meantime, believe me, ever
most sincerely the advocate
of "Escadilla Place" - as a "Home
for Invalids & a Med. Coll; for
the Education of Women", &
as ready - as I ever have
been to work for it - so long
as I can find a certain place
to "put my shoulder to the
wheel"

Most truly yours

Dear Sir.

I have carefully examined the Prospectus which I return herewith, and am satisfied that your plan offers excellent opportunities for energetic business men who have capital at their command. Cotton planting proved so disastrous that I am unable to avail myself of the advantages offered. I have desired and intended to locate in the west, but have not sufficient means unless I can find some employment that will aid me even though it be but little. I had not the pleasure of a personal acquaintance with you although many of my friends.

have, and some of them have informed me that you desire to secure agents to attend to land located, or to be located, in the west. I have only to say this, that in case you desire anyone to act in the capacity above mentioned, and have no one in view I shall be glad of an opportunity to obtain such a situation, and feel that I can satisfy you as to my fitness for such position by reference to friends from St. Louis, with whom you are personally acquainted. Should you require such services as I have mentioned please drop me at note care

Hon Ezra Cornell,
Dear Sir.

I believe that my father, the late Amos Dean, was not unknown to you. You are doubtless aware that for twenty five years & more he has been engaged upon a work on the history of civilization. In the preparation of it he has gathered a rare historical library. It consists of about 3000 vols, in most excellent condition, & is selected from many English & American libraries. It is very full on the subjects of Anthropology, Ethnography, Antiquity;

on researches in Ancient Asia
India, Egypt, Mesyria,
Babylonia, Persia, Assyria,
Arabia, Judea, Phoenicia,
Greece, & Rome. On the sub-
jects of Society, Philosophy
& Art it is peculiarly choice,
the latter being fully & beau-
tifully illustrated. ^{On modern Europe}
general history, it is also
very full. Men considerably
acquainted with books tell
me that it is the rarest
private library in the
Country. I have thus called
your attention to it because
we want to sell it & sell it
as a whole. Knowing your
relation to the Univ. that
bears your name, & on what
a broad scale everything
there is conducted I have
thought that you would

desire this library so care-
fully collected for your
University.

I should be pleased
to hear from you in regard
to the matter at your earliest
convenience, as we desire to
dispose of it by 1st May.

Hon: Ezra Cornell!

Dear Sir,

Allow me from here to drop you a few lines. I hope, that you still remember me. This summer I took the liberty to make known by a brief article in one of the leading papers of Copenhagen, Denmark, the great and almost unparalleled magnanimity and liberality you had shown in the establishing of the Cornell University, and that your children were, according to Prof. White's statement to me, just as much interested in the erection of this Institute of Learning as yourself. From a letter recently received from my wife I learn, that this example of liberality, which you have been pleased to set before our selfish world, has been the subject of an article in Denmark, in which you very correctly are called: "the benefactors of mankind", and in which the words of the

sacred volume are used: "Verily, verily, so great a faith is not found, no, not even in Israel."

Having all good reasons to believe, that this cannot but please you to hear, I have considered it incumbent upon me as a duty to inform you of it.

If Prof. Andrew White is in Ithaca, which I suppose he is, be pleased to pay him my most respectful compliments. His many-sided attainments combined with logical deductions and determinations of character will, I feel perfectly sure, and so do all, elevate your Institute of learning to such a standard as to gain the esteem and confidence of the public, and to meet the approbation of its liberal and sound-minded founder. After a few weeks I think, before going to New York to remain, to spend a few days in Ithaca, the natal place of old Ulysses, and shall then not fail

to present my humble self to you.

May the days, (be they many), allotted to you to remain in this earthly pilgrimage, be to you a period of unmingled felicity!

Deign, dear Sir, to accept the homage of my respect, and to believe me

Yours sincerely

STATE OF NEW YORK,

Department of Public Instruction,

SUPERINTENDENT'S OFFICE,

Albany, Feb. 18th, 1868

W. M. Phelps
a member of the
Board of Regents
of the State

Dear Sir:

Mr. White tells me that the question of a printing office for the Cornell University has been referred to a committee consisting of Mr. Greeley, Mr. Brooks, and Mr. Andrews. He also tells me that he has spoken to you about the matter, and that you are warmly in favor of it. I therefore write to you, instead of Mr. Greeley, as I know how much his time is taken up by various circumstances, and you can show this to him, if it meets your views.

There are three questions connected with this. The first ^{labor} is as to how much time can be daily devoted to it by the students; second, to what extent can the ~~typo-~~ ^{printing} ~~graphical instruction~~ be carried; and, third, what literary instruction is desirable and possible.

On the first question depend the two others. I think that about five hours a day might be profitably given to printing, two boys to work in partnership and to relieve each other, and a half holiday

to be granted out of this weekly to each of them. This would give them twenty-five hours of labor a week, which, estimated at half that of New York first class journeymen, would make their compensation about \$3.75 weekly, a sum sufficient to board them in Ithaca.

Second, how much instruction in printing should be given? This will depend upon the desire of the pupil. If he simply wishes to make his living while in the University, composition and some portion of proof-reading will be enough. If he hopes to become a thorough printer, a course should be given which would embrace book, newspaper, and job composition; proof-reading; hand, Adams, and cylinder presswork; a knowledge of the theory of stereotyping and book-binding; the management and fitting up of an office and its bookkeeping. I should take up newspaper composition, done with book-spacing, at first, and follow it with book-composition. After six months practice at this, require the apprentice to take his turns on reading first proofs, and continue this, simultaneously with composition, until the end of the first year. The hand-press should next come in order, and should be practiced a year.

Next the Adams Press, for six months, and then the
Chapier for the same time. Return him then to the case,
give him his turn on the make up and as copy giver,
and allow him to read second proofs. I donot
think this ought to be completed before his fourth
year ~~he~~^{is} up, and he should stay, at eight hours
per day, for another year, as a job compositor, a
proof reader, make-up, and as pressman on fine
work. This I would give as the rough draft of
the plan, not as perfect, but as the theory. If expe-
rience should prove five years thus spent too
short, add another year.

Third, the literary qualifications. These should
be placed high, and their value should rank
with their utility. I would place their order thus:
English grammar, ^{taught} very thoroughly, a study most men
among college graduates are deficient in; geography
very full, and history. This last study should
extend through the entire course, and is especially
important to a printer both as philosophy teaching
by examples, and as the particular knowledge of places
and names essential for correct proof-reading.
Algebra and geometry should be ~~to~~ a part of the
curriculum, but made subordinate to other branches.

Next, Latin, French, German, and Greek, in their respective order. Almost all large printing houses are obliged to send their work out to be read when they have anything in foreign languages. This should not be so. In France almost all the eminent printers who have brought up their sons to the profession, such as Didot, Crapelet, have given them a good classical and foreign language education. The question in this is not as to the general utility of Latin and Greek to mankind, but their particular utility to printers, whose art deals with language in its written form. I think Spanish and Italian highly desirable, but I would make them, like Greek, an elective study for the apprentice. A very thorough knowledge of three languages can be gained in four years, studied in the modern method. The principles of general law should be taught, as experience proves that a very large percentage of printers become editors and politicians, and a competent knowledge of English literature should also be given.

When is this work to come from? is the question. Mr. Mackellar, of Johnson and Co., in Philadelphia, thinks that plenty of booksellers' work can be obtained, if the work should be done good enough. For newspaper work, let an agricultural journal be established, edited by two professors of agriculture. Joseph Harris, one of these professors, is a veteran and experienced editor. At first, I would not recommend buying any press other than that necessary to work the newspaper, with the exception of hand presses, on which letter-press or small editions could be run off. Let all the work be stereotype, and the plates sent whenever ordered.

Yours truly, W. W. Pasko, Dept. Pub. Instrumt.

I was informed that you was about ready to commence ^{18th} furnishing the University and I thought I would write to you with regard to the matter I am A. practical Upholsterer and have had some 15 years Experience in the Business I have been ^{18th} furnishing Public Buildings for the last 8 years My manner of doing Business is as follows I give parties the Addresses to purchase any Upholstery Materials needed for Spring Beds, Mattresses Chairs Arm Chairs ~~Settles~~ Sofas &c. also all Frames needed ready for Upholstery and have them all taken to the Building and I do the Upholstery there. I do all the work by the piece. The advantages of having your work done in that way ~~is~~ are considerable

first you buy good material you are
sure you will get them in your work
second every thing is on the ground clean

My dear Sir
Yours of the 19th
reached me today.

I am very sorry that I am not
so situated that I can promptly
accept your proposition.

When at Albany I should
have accepted promptly, as
I was then free.

On my return from Albany
I found a letter from Mr C
W. Barry, inquiring from
young Bull, and I wrote him
offering the 4th Duke and
saying that I would hold
the Bull till I had his ans-
-wer in writing requesting
an immediate reply.

After that I received a letter

from J. W. Robbins of course
accepting an offer I had
made him of the Bull at
2750\$ giving me a bond in
which he should agree to
bring him the Bull back
again at any option, at
any time within three years
at the price paid.

In reply to which I have
written Mr. H. saying that
should Mr. Harry not buy
the Bull he might have him
as he offers. but that I
must know sooner.

Mr. Harry is at liberty to
take the Bull himself or
in company with either ~~Mr.~~
Capt. Gentry.

Now I am situated in that
way regarding the young Bull
I will say beyond that I must

of these offers are taken
that I will see him to get
a good proper one to
Mr. with interest.
I shall probably hear from
Mr. Harry within a few
weeks. Will then advise
you of the result, provided
you wish to purchase him
in case he is not sold to
Mr. Harry or Mr. Robbins —
as above stated —

Mr. Harry writes me that
3rd Last Express has failed
entirely & has got him but
five calves in all. He writes
that he has tried every thing
that could be suggested, and
at last resorted to the yoke
but all have failed — He
seems to deplore his loss very
much —

I am very sorry that you were
somewhat occupied at Albany
as I was then in a situation
when I could have sold you
the Book at the price you
now offer. Should the 4th
Book be sold I shall probably
have others very soon that
will answer your purposes
as well, and which I shall
be very glad to send you.

I can hardly tell whether
Mr. Hany will take the Book
whenever it is published, or that
he will, but the price is a
little over the mark, I think,

Very sincerely yours

James O. Sweeney

P.S. I fear from what I

I hear today that Harris will decline
the Professorship of Law at Amherst;
I hope he will not, as I think that
will be fitted to give it.

Dr. Sir

I am
desirous of interesting
the Trustees of the Uni-
-versity bearing your
name in a plan to
enhance the value
of Lands located upon
Strip gift by U.S.
in Western States &
Texas. I believe
I correctly understand
such locations to be
alternate sections of
a 36 sq. — therefore
of a 6 ac. Tract of
 36 . Left for schools the

16. & 32 leaving -
Thirty four 34. of 64.
each - & where the
quality of land was
fit for University
shut out of the 34.

17. alternately leaving
for actual sellers 17.
over portions of
Country & Swamp
we may make it
advisable to omit -

My suggestion will
be intimated only
now, & more in detail
to the proper person
having charge of
that subject.

I suggest a system
of enclosing & improving
in such way as to
get the cro. from

2/22/68
considerable bodies
of Land — throwing
fences around large
enclosures — so that
them should cover
up — & by including
the Calge Land
within fence & in
crops. it will be
sharing both in the
advances & loss
& contributing by
its crops toward the
expense.

My plan will
be seen by saying
I intend one ~~or~~
more persons. tho
I by no means
intend an incorporation
but solely as individuals
to do a profitable

sort of Farming &
to make improvements
count advantageously
by no means to
do what would be
damaging to the local
interest where the
Lands are situated
I beg to propose
this enquiry - who
shall control the
Remaining Col. of
Scip. & its sale
or price per acre?

I am &c
Very Respy
Yours
Oliver Child
