Capt Gunter — The Grange
Northsley — Yorkshire

I left London from the Paddington Station at 9th AM July 12th 62 - Via the Great Western RR to visit Edward Bowly's heard of Short Horns at Siddington House two miles from Cirencester, I reached the Cirencester Station at 12 4/4 Sec Class ticket 14/7= I got lunch at C, and hired waggon to take me to Siddington 4s for 3/6, when I returned driver asked for 1/- saying he got no pay of his master, I suspect that he lied but paid it.

I found the herd in pasture, Cows kept for dairy in one field, Yearlings & 2s in another, Calves in a third, Bulls & bull calves in Stables & Sheds =

The Cows are generally good Milkers those sired by the 4th Duke of Oxford 11387 have taken strongly the Oxford type, I could pick them out from this uniformity -

The heifers look well also, but I could not feel of them as much as I wanted to,

Of the Calves I selected two as my first choice, Nelly (49 on his calalogue) by Earl of Walton 17787 Dam Nightingale by 4th Duke of Oxford 11387 = She is fair size, has not been founced, is good mossy coat and mellow touch = Her dam is a good heifer light roan, a good Milker Did not see her grand dam =

The other British Queen (43) by Earl of Walton 17787 - Dam Britannia by 4th Duke of Oxford 11387 = I saw the dam, She is a handsom roan heifer and fair Milker = I also saw the Grand Dam, Buttercup by Snowstorm 12119 - She is a Dark roan Cow, a very good Milker, fine style dairy Cow, The Queen had a fine mellow and mossy hide = These Calves, were allowed to suck their dams 3 weeks, were then put on drying off Cows which they sucked 3 months, since on grass to which is added 2 lbs Oil Cake per day to each fed in field, and they lay in field all the time =

The price asked for these two Calves is 50 Guineas each that is $262.50

My next choice was, Rose of Oxford by Earl of Walton - Dam White Rose by Siddington Duke 15263 - and Meteor by the Earl of Walton, dam Plaut by 4th Duke of Oxford, These two were larger, being a few months older and equally handsom to look at but not quite so mellow to the touch = I saw the Dam Plaut which is a good heifer in calf again for to drop in Oct

I Saw the Earl of Waltons 17,787 he is Roan, 2 years old large Enough, good boulder, good Duchess Style, possessing the worstle lands of old Duke of Gloster = His Sire Delhe 15,865. is highly commended by the two Bells = Mr Harvey & Atherton = He was a Cherry Duke. Duchess Bull, and the Dam Kirklington 7th by Earl Derby. 10,177 I have seen she is a noble cow of old Duchess. type. good milker = 9/16 Duchess =

The 4th Duke of Oxford 11,187 I also saw at Mr Harveys. He is a noble old Bull. unobjectionable

Mr Edward Bowly is a spare, tall man locks turning gray - I judge about 60 years old, Engaged in brewing as well as farming Hes herdsman. says he gives calves just dropped. physic as follows for a dose. 1 table Spoon caster oil. 1 tea sp. Rhubarb - 2 do Magnesia. they will suck it from a bottle Alder an ounce, in mess the dose to fisic for scours =

Mr Bowly Wants to buy a Duchess Bull and attends Athertons sale, the 15th -

He says he has heard the 7th, Duke of York 17,754 of Capt Gunter = at $750. this season =

He says he wants one of the Thorn Bulls from America =

Mount Gloucester Sunday July 13. 1862

From this summer elevation about 500 feet above the plains below, which I name from its proximity to the town of the same name, lays spread out before me the most beautiful landscape I ever yet beheld. The City of Gloucester lays some two miles distant upon the plains that skirts the headwaters of Bristol Sound with its old cathedral as a centerpiece surrounded by the spires of a dozen other churches and public buildings—

Between the foot of the mount and the town is a belt of Gardens and parks a mile in breadth, through which two R R's wind their way— Directly over the square towers of the Cathedral & some 20 miles distant, towers the summit of the Eastermost craigs of the Welsh Mountains, to the right of which and northward the dim outlines of more distant ranges can be scarcely traced— The mountward swells those hills like the scalloped edge of a basin— Into which we look the Sound in the west— Intermediate the vast plains and ascending slopes are beautiful beyond the powers of language to describe— Parks, highly cultivated farms— the spires of villa churches— The domes and turrets of Baronial castles— and the silvery thread of the River as it winds serpent like among the shady meadows, and hedge bound lawns— This lovely picture of Green fields and brown fallows, made more lively by the sparkling silver fleeced Cotswold and golden coated Devons, relieved by the red, white & blue of the Short horns— is most charming in effect—

Turning to the right— We have a space from North to S. E. where the distant horizon is not obscured by hills, and the low lying scenery of park & lawn, is lost in the mist of the distance— For S E to East— a high range of hills draw gradually in from 15 to 10 miles with the intervening space— of surpassing beauty— In this basin S E of city, 4 miles distant, a hill like the one I am on not so high, and cultivated to summit East, is a steep bluff, 10 miles away, drawing in gradually southward, to within 4 miles of my position with beautiful interspersing valley, West & S W the plain extends and expands its beauty until the Waters of the Sound grow broader in this direction, the Sound is broken into different mountain lakes

Duke of W 1948 was bred by Jobson who used him 3 years - liked him much would not give him up - so says Mr Bell

Bates paid 70 G for Belvedere

Styles Stiles Rich Oldmanton Chippenham - Gloucester ~~Shire~~ ~~Co~~. England. Send him a Scale of Points.

Mr Bowly and Mr Rich were both acquainted with Usher and lived to him and both say he was a very fine Bull and that his stock was always satisfactory. When Earl Ducy bought the cow Duchess he told Strafford he should breed her to Usher - Strafford replied that Mr Bates would not do so -

After she dropped her calf
by mistake Earl Drury sent for Bry-
ford to come from London 160 miles
to see the calf - and said to S that
Mr Bates was right and I was
wrong - I will not do so again.

Machrum Cow by Machrum -
Mr Thos Bell said to me that
he purchased this Cow at the
Sale of
Mr Bates being present and saying
he had better buy her for there was
some good in her. After keeping
her a time he sent her to Mar-
ket and offered to sell her for 11 G -
but could only get 8 G offered
He therefore drove her home
and on informing Mr Bates,
of what transpired Mr B. said
he would take her at 11 G and
did so. After Mr B bred her to
and found she did so well he
there made enquiries about her and
was satisfied that she was a well bred
cow.

July 14 - Rode out to Mr Rowe's
and made preceding extracts from
the Herd books - Mr R had company
invited for Dinner and insisted on
my staying and dining. I did so
and met Mr Thos Bell, Mr Ed
Bowlby, Mr S Rich and several other
Gentlemen. Had a pleasant afternoon
and heard many old stories told a-
bout the Short Horns.

Memd- of voyage home
from Liverpool Sept, 1862
Ezra Cornell

Liverpool Sept 6 - 1862 -

Left the Washington Hotel at 8 A.M. the Tug left the Pier at 8.30 - and the Arabia passed the Tower at 9.30 = We parted with the tugs at 9 - A.M. = At 10-45 We stopped the Engines a moment and discharged the Pilot. Day pleasant with occasional sunshine - At 3-15 we passed Skerry light on a barren rockey Island off ~~Holly Head~~ -- Mrs Johnson required help to remove her from her room to the cab and from cabb to boat in a chair she is very feeble and it seems impossible that she should live through the voyage - 4 P.M we passed Holly-Head - At 8-15 - Sunday morning went on deck and found we were off Bally Cotton Light, and the cost of Ireland. Spray out to our right - at 10 - A.M we entered Queenstown Harbor - Weather coolish we delightfull. Slept well last night - Mrs Johnson rested better than she expected to. and seems better than yesterday morning -

We left the steamer at 12-30 for Queenstown by a small Steamer and at 1 - P.M landed on Irish soil for the first time -

At Queenstown we hired an Irish jaunting Car at 12/ and something for the driver - around the Island we saw a fair Specimen of Irish life got back to Steamer landing at 2 P.M I then spent an hour in looking through the streets of Queenstown. Wine society in all its phases from low to lowest and upwards was to be seen The beggars on wharf were as plenty as flies about a Sugar Cask. At 4 the tug left for the Steamer, and about the same time the Arabia started moving slowly down N. bay we overhauled her and went on board 4 3/4 P.M and the Tugg left us at 5 - At 6.15 we passed Old Kinsale head light upon a very bold rocky point. below this point a beautiful stretch of land lay off to our right presenting a lovely agricultural landscape

Sunday Sept 14. 62 We passed Cape race at 12 M. wind fair blowing fresh. no news boat in sight Thrown over the dispatch Can.
