IN CHRONOLOGICAL ORDER

For the first time in the history of legal procedure and jurisdiction, it has become possible to present in sound and picture the significant events of an historical period.

In the case of the present war crimes trial, the International Court is in the position to found its examination of the responsibility and guilt of the Nazi leaders, their accomplices and organized followers on the basis of factual evidence presented in the form of documentary photographs and original speeches.

Newsreels, made on the spot, are presented in chronological order, revealing how the Nazis have prepared, started and prolonged the Second World War.
