

CURRY®

SOYBEAN PRODUCTS

RELATIVE MATURITY: 3.0

1308™ BRAND

Glyphosate Tolerant

Developed using the Accelerated Yield Technology (AYT™) System from DuPont Pioneer

GRAIN RATING

SEED SIZE SCORE (Seeds/lb.)	2.2 – 2.6
PROTEIN	35%
OIL	20%

Protein and Oil %s are calculated based on 13% moisture. The value may vary based on growing season and location.

RATINGS: 9 = Superior, 1 = Poor

CANOPY WIDTH: 9 = Extremely Bushy, 1 = Very Narrow

APHID TOLERANCE: AA = Above Average
A = Average
BA = Below Average

SEED SIZE SCORE: 9 = Small, 1 = Large

*: No Data

†: Preliminary Data

PHYTOPHTHORA RESISTANCE GENE

Rps1c = Resistant to races 1-3, 6-11, 13, 15, 17, 21, 23, 24, 26, 28-30, 32, 34, 36

Rps1k = Resistant to races 1-11, 13-15, 17, 18, 21-24, 26, 36, 37

Rps1a = Resistant to races 1, 2, 10, 11, 13-18, 24

Rps6 = Resistant to races 1-4, 10, 12, 14-16, 18-21, 25, 28, 33-35

Excellent yield potential; replacement for 1301™

Medium tall, medium bushy soybean

Outstanding Downy Mildew Tolerance

Multi-race Phytophthora resistance (Rps1k)

Moderate IDC tolerance

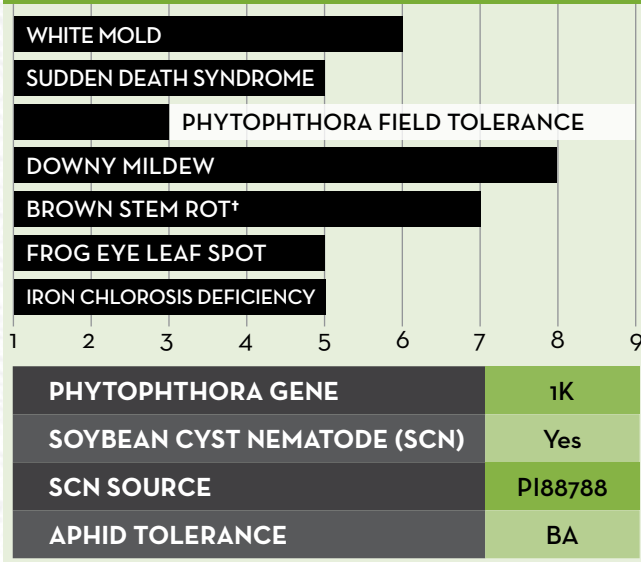

Excellent harvest standability

Very attractive field appearance

PLANT CHARACTERISTICS

DISEASE / INSECT TOLERANCE

1308™ BRAND

IMPORTANT: Curry® brand products are provided subject to the terms and conditions of purchase which are part of the labeling and purchase documents. Trait rating scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by Curry. Information and scores are assigned by Curry and are based on period-of-years testing through 2014 harvest and were the latest available at time of printing. Some scores may change after 2015 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.

Always follow grain marketing, stewardship practices and pesticide label directions. Varieties that are glyphosate tolerant (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.
