Introduction

Just wanted to say a big Thank You for downloading my 'Top 5 Online Marketing Mistakes' Report.

First and foremost I just want to introduce myself and let you know that I was right where you are when I first got started in Internet Marketing. I had big hopes and dreams and wanted to make tons of money and have a life of freedom just like all the 'hyped' up sales pages, company compensation videos, and top internet marketers were telling me.

Internet Marketing, like any other industry, is just all about 'what works'. While I can't describe to you in this Report everything that 'works', I can tell you that if you correct these 5 mistakes you will be building a solid foundation for years to come.

You will also be ahead of 95% of other marketers and competition for your related business opportunity or product.

Ready to get started? Of course you are!

MISTAKE #1: HIDING BEHIND A WEBSITE

This is by far the biggest Mistake I see people do when they want to sell or promote a product or business opportunity online. They simply just do not want to 'get themselves out there' or let anyone get to know them.

This is a huge and crucial Mistake!

People will always buy from someone they like, trust, and more importantly can find a connection or identify with. This will always be the truth when someone buys anything online.

If you are not allowing your customers or your prospects to get to know you and that you are a real life human being just like they are, then you will certainly have NO success in online marketing whatsoever.

This is the reason why Video Marketing is so hugely beneficial in Online Marketing, it allows anyone viewing the video to get to know you personally.

If you want big sales online, then bridge the connection between your prospect on the other side of the computer screen looking at your content as much as possible. This is accomplished by you yourself educating and talking to the prospect like a real life human being, as if you were face to face.

I've always treated my online prospects or customers just the same as if they were in my living room, my results speak for itself!

MISTAKE #2: USING COMPANY REPLICATED WEBSITES

You cannot have big success online by only using your company's replicated website given to you when you become a partner, distributor, or affiliate selling their business /product. They just don't work for big success online.

You have to create YOUR OWN STORY with the product/opportunity you are promoting. This is impossible to do with a company replicated website.

Company replicated websites most always do nothing in letting your prospect or potential customer get to know the person they are buying from, so don't use them if you want big

success online.

Making a great personalized website that features you and tells your story converts about 100x more than any company website.

A great example of this would be my low ticket online business called Instant

Cash Solution. <https://instantcashsolution.com/homepage.php?user=dfroelke>

Compare my site to the company's website:

<http://dailypaynetwork.info>

Think about it. Most everyone in your opportunity or selling your product as well is using these company replicated websites, if you are just doing the same thing what kind of results are you going to get?

Being unique and setting yourself apart from the competition is the number 1 key to success in marketing any online product or business opportunity. Be unique if you want a unique income!

MISTAKE #3: NOT TREATING YOUR BUSINESS LIKE A BUSINESS

This is one of the most crucial mistakes I see from people wondering why they are not getting the results they want.

Unfortunately a lot of people sign up into an affiliate marketing program or get started selling online and just simply do not treat it like a business.

They do not consistently work towards a goal or have any idea or goal of where they want their business to go, so therefore there is no expectation of the business doing anything.

This is a 'playing around' type of mentality that will get you nowhere in Online Marketing. If you want your business to grow, you have to treat it like a business and be accountable to yourself, each and everyday, and to make a commitment to working your business.

Online Marketing is work like anything else in life, and money will never magically fall into your lap without you putting the 'work' into your business.

The life of freedom and the ‘internet lifestyle’ will only come after you putting an incredible amount of consistent hard work into your business. How much you are able to ‘grind’ and how much you want it will be the sole factor in how your lifestyle is determined later. This is the absolute truth.

What personally skyrocketed my own businesses(es) was setting goals each month and writing down tasks each day on a large desktop calendar. I would personally write down each task and mark through when I completed each task that day. When all tasks were completed I would then make a giant red X for that day.

This is awesome and motivating over time and trains your subconscious mind to be accountable to your goals online.

‘Treat your business like a business, it will pay you like a business. Treat your business like a hobby, it will pay you like a hobby.’

MISTAKE #4: LACK OF FOCUS

In my opinion this is the biggest reason why most fail online. If you cannot focus on your business and completely disregard the huge amount of garbage and hype that is being thrown at you constantly about the ‘next greatest program’ or ‘greatest product ever’ you will absolutely have zero success in your online marketing.

You will jump from program to program to product to product and you will never make a dime with any. In fact if you are reading this, you’ve probably been guilty of this already. Focus is so absolutely crucial because the Internet itself is nothing but a huge distraction through various forms of social media, search results, and other time wasting unproductive activities.

This is also referred to as ‘shiny object syndrome’ and this is a condition where an individual is easily distracted by ‘shiny objects’ popping up around them. Unfortunately the Internet is full of these shiny objects and should be avoided at all costs.

Get out of this habit now or forever be doomed in Online Marketing. In fact get into the process of completely tuning everything else OFF whatsoever when doing any kind of work regarding your business while online.

That means NO Facebook, Youtube, Instagram, Pinterest, or whatever time wasting site you fall prey to when you get online to work on your business.

I never pay attention nor have I ever paid attention to what ‘anyone else is doing’ frankly because it is too distracting and also because I don’t care. I’m too laser focused on what

I'm doing and building tons of original content related to my market.

That is why I completely dominate any market I get involved with and if you want to make serious money online, you HAVE TO LEARN TO FOCUS.

MISTAKE #5: COMPARING YOURSELF TO TOP MARKETERS

When first starting out or going through the process of learning a new skill, we always tend to compare ourselves to the masters of that skill.

I find this unfortunate because people get very discouraged even before they even allow themselves to get started.

While it's always good to have a 'model' or someone you want to emulate, it's not good to unrealistically expect the same kind of success as someone who has been doing this for much longer time period than you and has achieved success through much persistence and hard work.

The worst thing you can do in this industry is put too much stress on yourself for not making a big income very quickly, most anyone credible in the industry has made their success through a lot of trial and error, and they most never had success overnight.

We all started somewhere, and if you are just beginning know that Internet Marketing takes time to learn just like anything else, some have success faster than others but that's ok because this is not a race.

Don't compare yourself to someone that makes over 10k monthly when you've yet to make your first dollar.

Rome was not built in a day and neither are huge incomes from an online business, no matter what anyone else 'hypes' you or tells you.

Instead of comparing yourself to a top marketer, it's much better just to listen intently on what they are trying to tell you and teach you, learn and most importantly take ACTION.

Your ability to TAKE ACTION, more than any other ability whatsoever, will determine how quickly or how slowly you have success, and this is the absolute truth in this industry, no matter what anyone else will tell you.

Conclusion

Well that's it. Believe it or not these are the only 5 Mistakes you'll need to create a

large income online. No matter what anyone else says it's really that simple.

It's been said that there is a 95% failure rate in online marketing/network marketing/internet marketing and after my 1st very successful year in this industry, these 5 mistakes are the biggest cause of that failure rate from what I've seen and by personally referring close to 1,000 people into my online business.

What I didn't mention within these 5 Mistakes but is also absolutely crucial in your success online is simply the mindset of what you believe you are capable of.

Mindset is EVERYTHING.

We all have garbage floating around in our head telling us that 'we are not good enough' 'don't deserve it' 'success is for those other people' 'they just know how to do that stuff' and other types of ridiculous thought patterns that will do everything to keep us broke and just getting by.

This is why it's so crucial to start now reversing your mindset and start believing your success will not only happen, but will happen and bend the universe to your will.

In fact I'm going to give you an absolute free gift to you since you've downloaded and read this free report. **It's a book that I read that absolutely changed my life and my belief in myself.** If you apply what's in this book or just simply read this book, I can guarantee your life will change in a huge way.
