Letter of reference for Kids College

Kids College is a wonderful program. Our school is using it in Kindergarten through 12th grade. It has many outstanding features which keep the students interested in participating. This is our first year to put into full swing and it is a great success. Our Special Education teachers are praising the program as well.

Our biggest surprise was the number of students that work on it after school and on weekends. Parents call me to get more information almost daily.

I am the Special Education Director and Federal Programs Director at Silo. I was fortunate enough to write a grant to purchase the software. It has been the most wonderful software I have ever personally used.

Ms. Kathy Robinson is the person we purchased through. She is very helpful throughout the purchase and after the sale. We do a lot of business with Schoolware. I have personally known Kathy for approximately ten years and she is good to her word.

If you have any questions, please do not hesitate to contact me at 580-924-7000 ext. 244.

Sincerely
Kim Marlow, Silo Public Schools
