

Open Path HMIS Reporting – Generating an APR

This job aid is for the Open Path software used for HMIS reporting. It will walk the user step by step through how to generate an APR report, generate a Data Quality Report, and how to search for a client.

The company name who developed the reporting software is *Green River*, the software is named *Open Path*, and on the OKTA home screen, the chicklet to access the reporting software is *Allegheny HMIS Warehouse.* You may hear any of these names used to refer to the same reporting system.

Please note that the data in any report pulled reflects data as of 6 AM the current date. If changes are made in HMIS, to see the changes reflected in an Open Path report you will need to pull it the next business day

Accessing Open Path

Log into OKTA and you will see the chicklet (box) for Allegheny HMIS Warehouse. This is the Open PATH HMIS reporting system. Click the Allegheny HMIS Warehouse.

Basanti Validi ble Q5a: Report Validations Table 5 ion & Data Osuli Table Q6a: Data Quality: Personally Identifiable Info

The report will display the date range, program/provider, person who ran it, and other parameters selected at the top of the report with APR questions below.

Table Q6c: Data Quality: Income and Housing Data Quality

	A	В	c
1	Data Element	Error Count	% of Error Rate
2	Destination (3.12)	0	0.0000
3	Income and Sources (4.02) at Start	1	0.0222
4	Income and Sources (4.02) at Annual Assessment	1	0.0270
5	Income and Sources (4.02) at Exit	0	0.0000

Under each Question/table, clicking the number in each column will open up a drilled down report of all clients who meet that criteria.

Clicking the number in the Error Count column for any question will open up a report of all clients whose records have an error for that question.

APF	APR Question 23 B39							Download							
Clie	Fi nt na	irst ame	Last name	First date in program	Last date in program	Head of household	Destination	Housing assessment	Prior living situation	Head of household	Household	Household type	Household members	Move in date	Pr Project tra type m
; (

Drilling down will display the client name and information, but clicking the "I" symbol under the client's name will open up a pop-up of the client's personal ID (MCI ID) and name to assist the user in identifying the client to make any updates in HMIS.

In the drilled down section, the **Download** button at the top right will download all errors into an excel and drill down to show which clients have errors and for what data elements and collection points
