

00:03:04 Deborah Nelson: What time is the webinar?

00:46:38 Kathryn Schultz: Mahsa, highly recommend having your patient get a pelvic ultrasound and check for fibroids. I had extremely heavy periods and turns out it was due to a huge fibroid. I had a fibroid embolization and haven't had a period since despite the continued presence of the fibroid. Of course, I'm also continuing to address the hormonal imbalances...
