EXECUTIVE, ENTREPRENEUR NAMED TO ENERGY RESOURCES DIVISION

EnerNOC Senior VP, Energy Industry Veteran Giudice appointed Commissioner of DOER

BOSTON – Energy and Environmental Affairs Secretary Ian Bowles announced today that he has appointed Philip Giudice, currently Senior Vice President of Corporate Development for EnerNOC, Inc., and a member of the company’s board of directors, as Commissioner of the state’s Division of Energy Resources. Giudice takes office July 1.

“Governor Patrick and I are pleased to have one of the region’s leading energy-technology entrepreneurs turn his personal energies to public service, for the benefit of the Commonwealth,” said Secretary Bowles. “Phil Giudice is a proven innovator who will bring unmatched creativity to the challenge of taking a quantum leap forward on energy efficiency and renewable energy in the years ahead. Governor Patrick has made his expectations clear: Massachusetts will be second to none when it comes to leadership in building the clean energy economy of the future.”

A geologist (B.S. from University of New Hampshire and M.S. in Economic Geology from the University of Arizona) and management professional (M.B.A. from Tuck School of Business at Dartmouth) with 30 years experience in the energy industry, Giudice was a Vice President, Senior Partner, and leader of Mercer Management Consulting’s global energy utilities practice prior to joining EnerNOC.

EnerNOC, with headquarters on Federal Street in Boston, is a start-up company providing electricity demand-management services to businesses, utilities, and grid operators to obtain savings for corporate customers and relieve stress on the system that provides all of us with reliable electricity. In May, EnerNOC raised $99 million in an initial public offering.

“Massachusetts has an amazing opportunity to capitalize on the wealth of talent, capital and creativity coalescing here around clean energy,” said Giudice. “I have spent 30 years in the energy business as a geologist, consultant, and businessman, and I have been blessed by success.
Now, I want to make a difference, and as Commissioner of DOER in the Patrick Administration, I will have a chance to do that. I can’t wait to get started.”

“Phil’s background, knowledge, and expertise will serve the Massachusetts Division of Energy Resources well,” said Gordon van Welie, chairman and CEO of ISO-New England, which oversees the regional power grid to ensure reliability in electricity distribution. “Demand-side resources, or those resources designed to reduce electricity use, have an important role to play in managing the region’s electricity needs. Phil’s background and expertise are well suited for the advancement of these resources in Massachusetts.”

“Phil has played a key role in efforts to combine all demand-side resources – real-time demand response, energy efficiency, and renewables into an integrated package,” said Stephen Cowell, chairman and CEO of Conservation Services Group. “At EnerNOC, which is one of the rising stars of demand response, he didn’t only promote his company’s technology, but worked in a collaborative way to reach a much bigger goal. I think he’ll be great.”

Giudice is also active in the nonprofit realm. He is board chair of the Center for Effective Philanthropy and a board member of City Year Boston. Previously, he served full terms on the board of the First Parish Church of Wayland (Unitarian Universalist), the Haitian Health Foundation, and was the founding chair of Boston Cares.

The Division of Energy Resources is responsible for reviewing the energy efficiency plans of electricity distribution utilities, which are funded by ratepayer charges, and for regulating the Renewable Energy Portfolio Standard, which requires that power suppliers obtain an increasing amount of their electricity from renewable sources of energy. DOER also provides analysis and public information in the interest of ensuring an adequate supply of clean, reliable energy of all forms in Massachusetts.

Under Governor Patrick’s Cabinet reorganization, which went into effect April 11, DOER was moved from the Office of Consumer Affairs and Business Regulation to the Executive Office of Energy and Environmental Affairs.
