Troubleshooting / FAQs for Pocketpc:

Q1: I copied the wallpaper to my Blackberry and they don't show up on the picture directory!

A1: The #1 reason for users who have this problem is that the image files (i.e. the .gif / .jpg files) are not copied DIRECTLY to the device. Make sure that the copied .gif / .jpg files are in the picture folder of your Blackberry, and not under any sub-folders or the storage card. Otherwise, the wallpapers will not be recognized by the Home screen and will not appear in the picture directory. Don't drag the whole "wallpapers" folder on your Blackberry. Instead, go INSIDE the "wallpapers" folder and then select and copy the .gif / .jpg files.

Q2: I copied the GIF / JPG files in the Blackberry picture folder, but I cannot use them as Home page wallpapers. Please help!

A2: Please make sure that you are having Blackberry Device. Please go through the Blackberry User Manual.

Q3: I double-clicked on the .gif / .jpg files on my PC, but Windows does not know how to open the file.

A3: The .gif / .jpg wallpaper files must be copied to your Blackberry picture directory to work. Follow the steps in the "Installation" section of this document to install them.
