## 1. Introduction

Funny Tools for Images is a easy-to-use image editor. You can modify your favorite pictures of friends, family or anything else by warping and altering any image on your handheld. Use the creative tools we provide and turn your photos into new works of art. Warp, distort, cut, zoom ... do whatever comes to mind! Your imagination is the only limitation.

Note: Version 2.0 may include new tools, enhancements, and bug fixes. Subscribe to our newsletter at [www.mlifestyles.com/funnytools](http://www.mlifestyles.com/funnytools) to stay up-to-date about new releases.

## 2. Quick Start

1. If you haven't already, install the ActiveSync software that came with your handheld onto your desktop computer, connect your handheld to your computer, and perform a sync operation.
2. Install the Funny Tools for Images software to your handheld via ActiveSync and launch Funny Tools for Images.
3. Use the menu and tools inside Funny Tools to work with images on your handheld.

## Funny Tools for Images Top Five Tips

**TIP 1:** Share your "works of art" with others in the Funny Tools Community on our website. After all, half the fun is showing off what you've created!  
[www.mlifestyles.com/funnytools/community](http://www.mlifestyles.com/funnytools/community)

**TIP 2:** Try using different instruments in the toolbar (on the left side) and be sure to play around with the settings for your tools on the "setbar" (under the main menu)

**TIP 3:** Search and locate images on your handheld using "File" in the program menu. Transfer new images to your handheld via ActiveSync from your PC, or by loading an SD card with photos from your digital camera into your handheld.

**TIP 4:** Export modified images from your handheld to your PC via ActiveSync, and use the images in e-mails, web sites or elsewhere. Bear in mind that altered images are saved only in BMP format. It's a great way to add some humor to your communications!

**TIP 5:** Check the main menu of the program under "Help" for assistance and more tips. You'll also find more information about Funny Tools on our website,  
[www.mlifestyles.com/funnytools](http://www.mlifestyles.com/funnytools).

### 3. Installation

The files in the software you downloaded or included on the CD-ROM are ready for installation to Windows, Mac or Linux computers. Note that you must have the program "ActiveSync" installed on your computer, have the handheld connected to your desktop computer and be able to synchronize your handheld with your computer.

#### **Windows PC Installation:**

1. If you are installing from a CD-ROM, insert the disk into your PC's CD-ROM drive. The CD installer will start automatically.
2. If you are installing from a file you downloaded, extract the files to a convenient place on your computer, then double click on the "Setup - Funny Tools for Images" icon.
3. Follow the installer instructions.
4. Synchronize your handheld with your PC, and the Funny Tools for Images will be installed on your device.
5. Find the Funny Tools for Images icon on your handheld in the Start menu or under Programs, and click it to launch the program.

#### **Macintosh Installation:**

1. To install Windows Mobile / Pocket PC files onto a handheld from a Macintosh computer, you'll need a utility program that permits such an installation. If you need help with this, just write to us at [service@mlifestyles.com](mailto:service@mlifestyles.com).
2. Insert the Funny Tools for Images CD-ROM, or open the file you downloaded.
3. Follow the installer instructions.
4. Synchronize your handheld with your PC, and the Funny Tools for Images will be installed on your device.
5. Find the Funny Tools for Images icon on your handheld in the Start menu or under Programs, and click it to launch the Funny Tools for Images.

### 4. Registration

If you are using a trial version of the software and are ready to purchase the full version, please go to the website where you obtained the trial version and complete the purchase of the full version. After completion of the purchase, you will receive a registration code. Note: if you have already installed the trial version to your handheld, you do not need to install the program again to get the full version. Just enter the registration code, and the software will be unlocked.

1. Launch the Funny Tools for Images Software on your handheld.
2. On the Welcome screen, tap the "Enter Reg Code" button.
3. Enter your Registration Code, and tap the OK button.

## **5. Using the Funny Tools for Images**

### **Ways to Use Funny Tools**

Funny Tools is an entertaining way to spend some time just playing with images, but it can also be used for changing the pictures you use every day on your handheld, for example in Contacts.

### **Attach Images to Contacts**

You can use Funny Tools to change the photos associated with your Contacts. When you bring up their contact info or they call you on your smartphone, you will see the image that you updated using Funny Tools!

Just launch Funny Tools and browse to the images you have taken with the camera on your device (if available) or have otherwise loaded into your handheld. Open an image in Funny Tools and make any changes you like, then save the new image in the same folder but using a different name. Next open your Contacts application, and assign the new image to your given contact. It's that easy!

### **Work with Your Favorite Photos from Your PC or Digital Camera**

If your handheld doesn't have a camera, be sure to transfer some of your favorite images and pictures from your personal computer onto your handheld.

The following image formats are supported by Funny Tools: bmp, jpg, png and gif. Note that images you change are saved in bmp format only.

Warning! Funny Tools works with pictures from your PC or digital camera only up to a certain size, 640 x 480. If your picture is bigger than 640 x 480, you must first re-size the image using photo editing software on your PC, and only then load the image onto your handheld.

### **Use Your Creations on Your PC**

Export modified images from your handheld to your PC for use in e-mails, web sites or elsewhere. Add some humor to your communications!

## Share Your Work in the Funny Tools Community

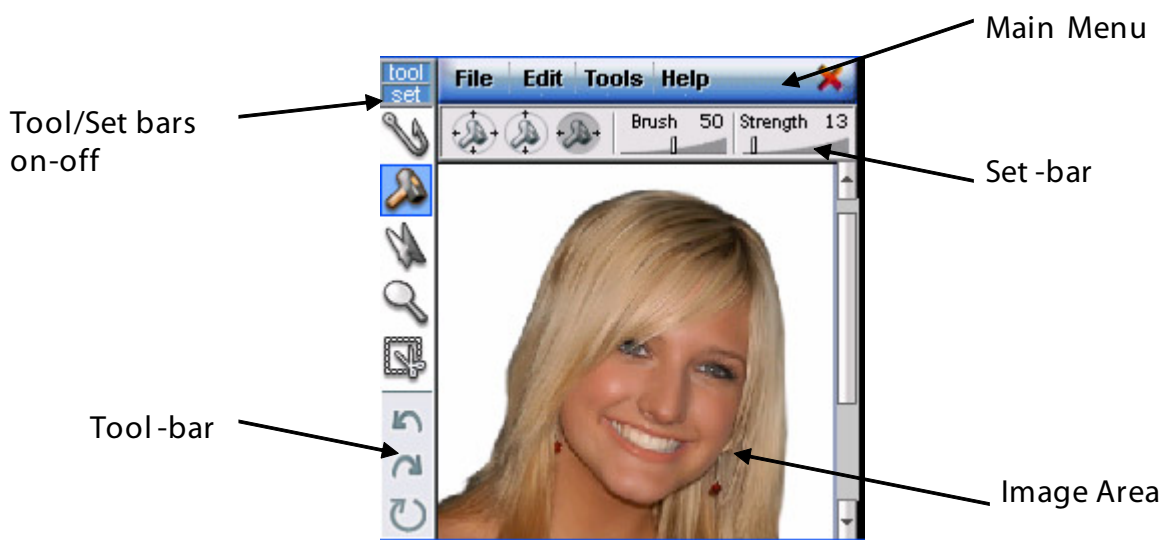

Our website offers a forum where users can share their "works of art". After all, half the fun is sharing what you've created!

## Kill Some Time - CREATIVELY!

Funny Tools is a great way to spend some time in-between meetings or while travelling. Exercise your creativity for a change. It's good for you!

## Main Window

The structure of the main interface of Funny Tools is shown below:

**TIP 1:** Use the 5-way controller on your handheld to copy an image.

**TIP 2:** You can use the 5-way controller to quickly access and navigate through the program menu. Open the menu by clicking the hard button on your handheld "Menu".

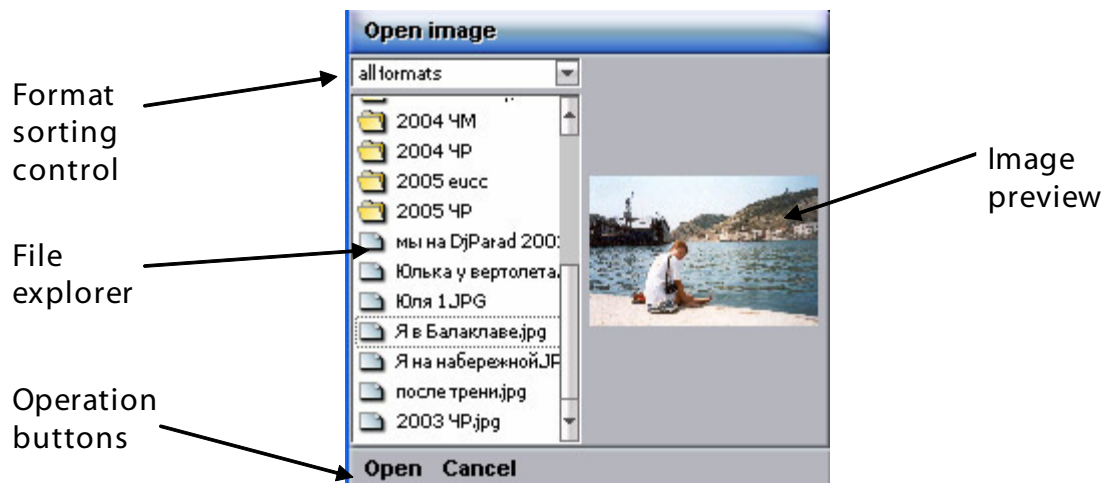

## Working with files

The following operations may be performed with your files ("File" in Main menu):

- Open an image
- Create a new image
- Save an image
- Use an image from our Gallery

## Open an image

To open an image file on your handheld, launch Funny Tools and click "Open...". You can view thumbnail copies of the images available on your handheld to help you choose the image you will work with. Browse the files on your handheld to search for images.

**TIP 1:** Use the 5-way navigator on your handheld to quickly move through th catalogs on your handheld.

**TIP 2:** The program buttons (left and right) function as the Operation buttons when Funny Tools is open.

### Create a new image

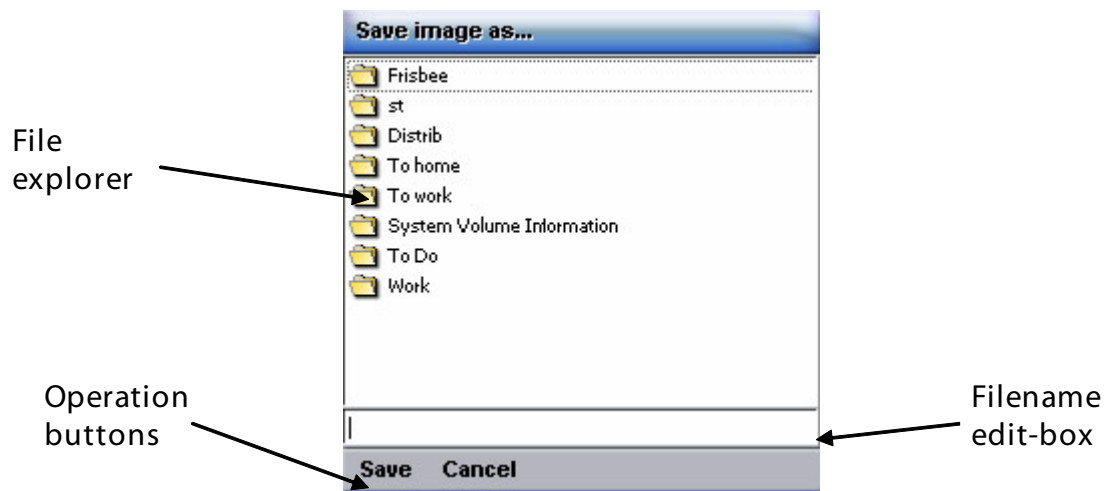

If you haven't loaded any photos or other images onto your handheld, just click "New" and work with one of the images from our Gallery.

New images will load randomly from the Gallery, so keep clicking New until you find an image you like.

### Save an image

Save your work in a new file (bmp format only). Use the keyboard to enter a file name and click the "Save as..." button. After your file is saved, you can send it to a friend directly from your handheld by beaming or e-mailing it, or by syncing the image to your PC. Just find the image in the backup folder on your PC and use it from there.

To save an image in the same location you opened it from, just select "Save" from the menu.

**TIP 1:** Use the 5-way navigator on your handheld to quickly move through the catalogs on your handheld, and to place the cursor in the file name field.

**TIP 2:** The program buttons (left and right) function as the Operation buttons when Funny Tools is open.

## Working with an image

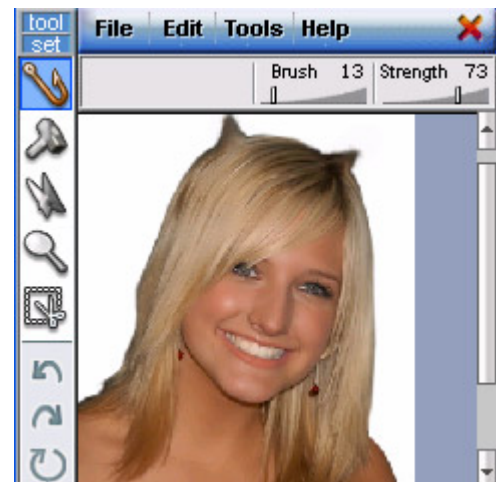

You can use the following tools to alter your images:

Hook  
Magnifier  
Gripper  
Zoom  
Trim

**TIP 1:** If your handheld has a keyboard, you can use the hard buttons "H", "M", "G", "Z" и "T" to quickly select the corresponding tool.

### Hook

Hook stretches the image along the path of motion of the stylus. The Strength setting of this tool influences the range over which the image will be stretched. The Brush of the tool influences the area over which the image will be stretched. Play with the settings to find the right fit for your work.

## Magnifier

You can flatten an image in any direction you choose.

- Left, right, up and down
- Left and right only
- Up and down only

The Strength setting of the Magnifier influences the degree to which the image will be flattened.  
The Brush of the tool influences the area which will be flattened.

## Gripper

Squeeze an image in any direction you choose.

- Left, right, up and down
- Left and right only
- Up and down only

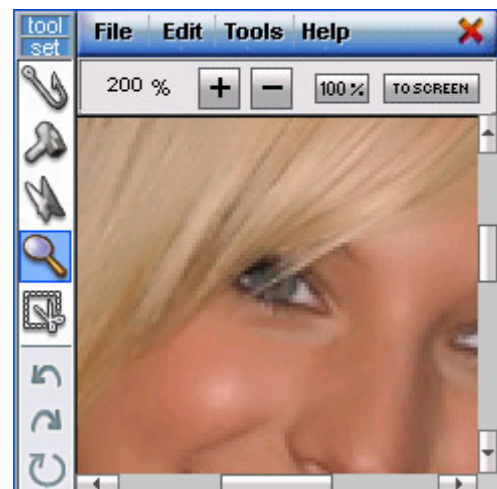

The Strength setting for this tool influences the degree to which the image will be squeezed.  
The Brush of the tool influences the area which will be squeezed.

## Zoom

Click "+" to zoom in to the next pre-set level, or click "-" to zoom out to the next pre-set level. If you want to see an image in its natural size, click "100%". If you want the image sized to your screen, click "to screen".

**TIP 1:** If your handheld has a keyboard, you can use the hard buttons "+" and "-" to zoom in and out.

## Trim

You can trim your images by following these steps.

First, select part of an image:

- click on your image
- move the stylus
- then move it up

Next, if you want to copy this re-sized image, just click "Copy". Click "Paste" if you're ready to paste the new image somewhere else.

Click "Cut" to cut a part of an image. If you'd like to work with only the part you have selected, click the "Crop" button.

## Undo and Redo

Use the left arrow on the tool-bar to "Undo" the previous action, or the right arrow to "Redo". Click the cycle arrow to undo all of your edits. You can also use the "Edit" items from the menu of Funny Tools.

Undo

Redo

Undo All

## Help

Select "Help" in the main menu to open up text files with useful information about Funny Tools.

## 6. System Requirements, SD Cards, Trial Version and Limitations

### Funny Tools for Images, ver 1.1, released in December, 2005:

- 700 KB of available memory for the application

**Compatible Devices:**

- Windows Mobile 5.0

**Running the program on an Expansion Card:** Funny Tools for Images can be installed and run from an expansion (SD) card. However, you must install the application directly to the card from your computer. It is not possible to copy the application from the internal memory of your handheld to the expansion card, as the application is locked on the device after installation.

**Trial Version versus Full Version:** The Trial Version of the Funny Tools for Images has all of the same features as the full version, but the trial is limited to four launches. After the fourth launch, the program will not open again until you purchase and enter a registration code. Just go to the website where you downloaded the trial version to purchase a registration code.

Warning! Funny Tools works with pictures from your PC or digital camera only up to a certain size, 640 x 480. If your picture is bigger than 640 x 480, you must first re-size the image using photo editing software on your PC, and only then load the image onto your handheld.
