

ECHELON INSIGHTS

ATLAS OF SPLIT-TICKET VOTING

*Donald Trump vs. Republican
U.S. Senate candidate
performance in 2014 & 2016*

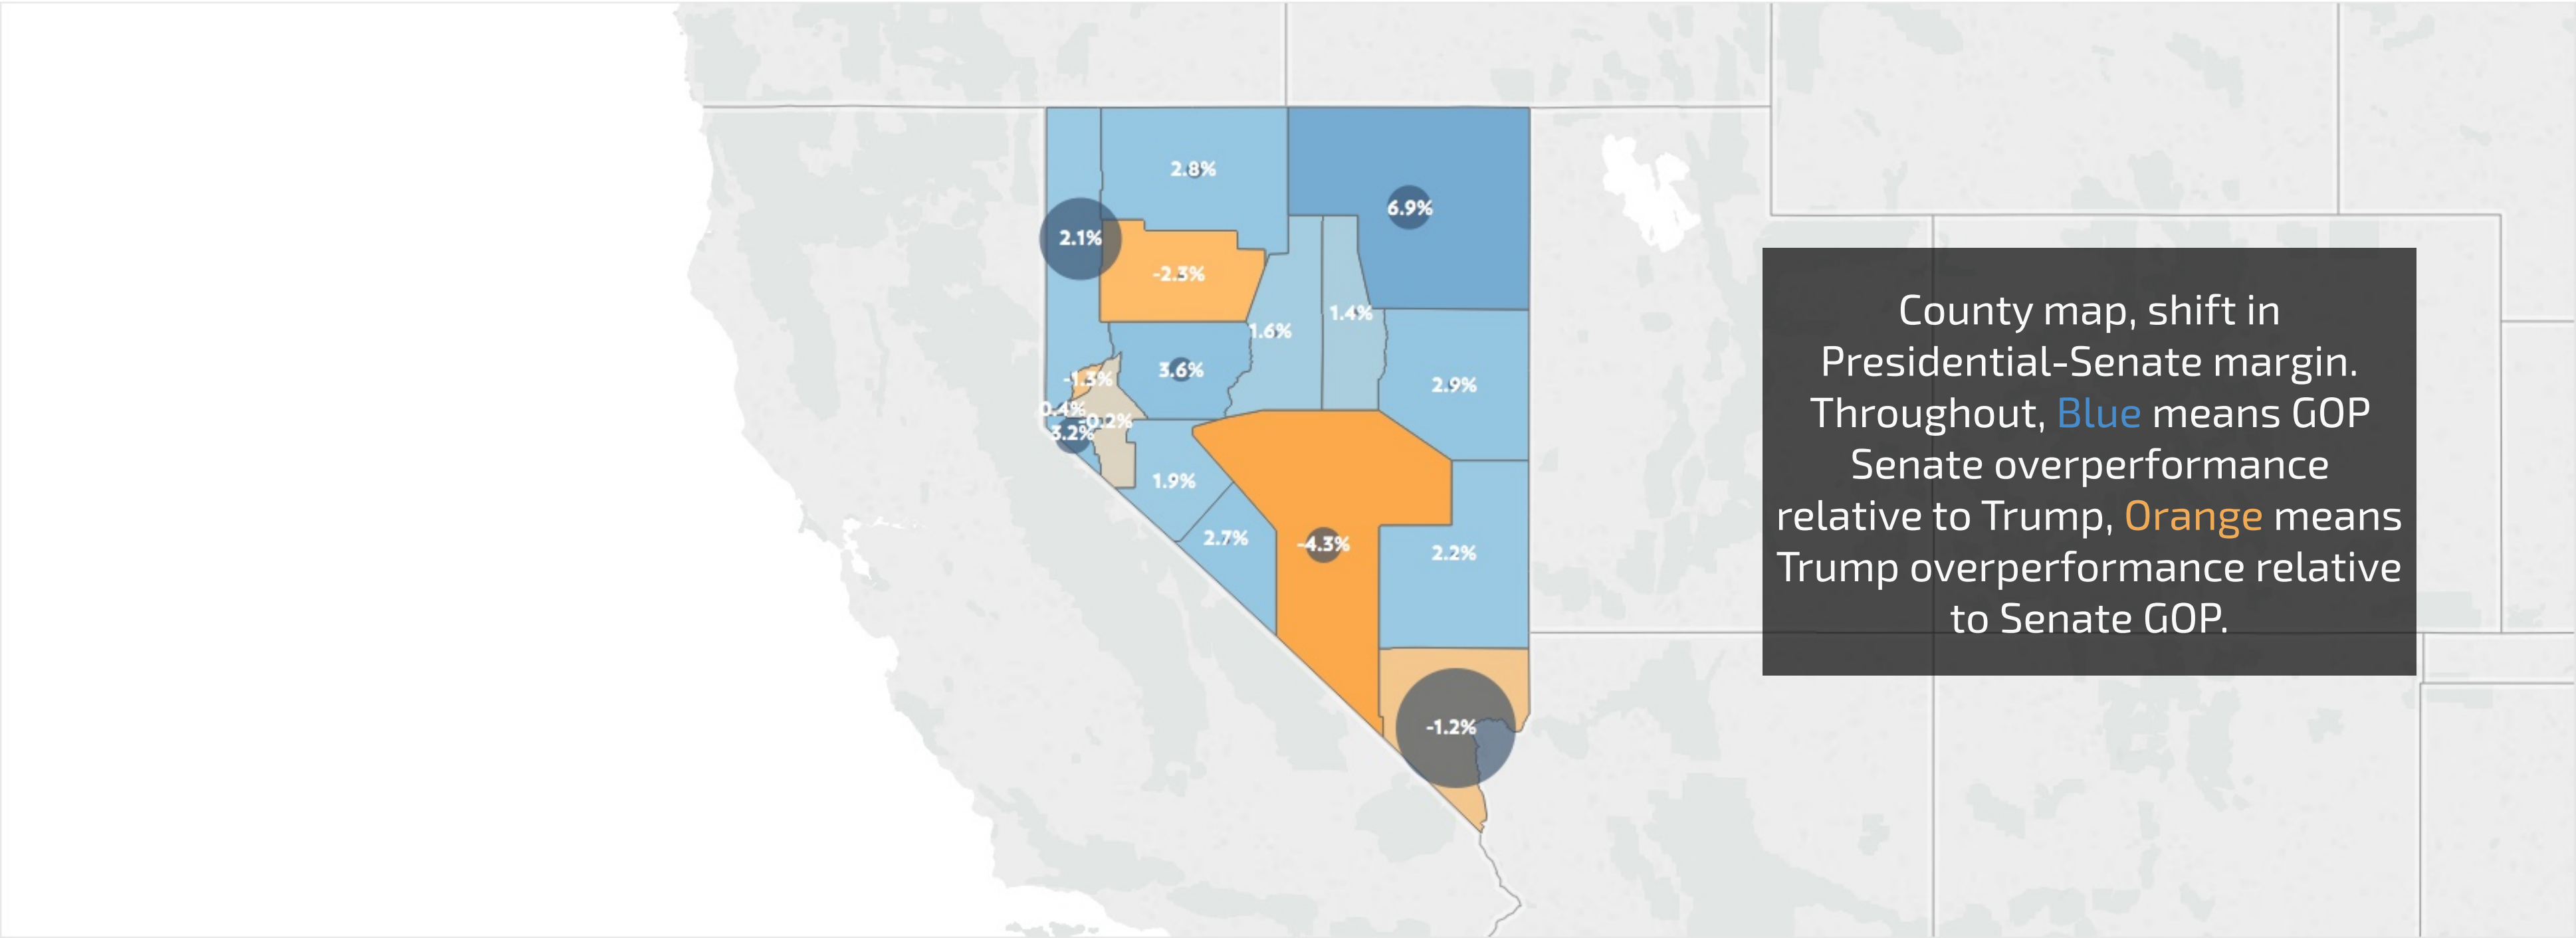

OVERVIEW

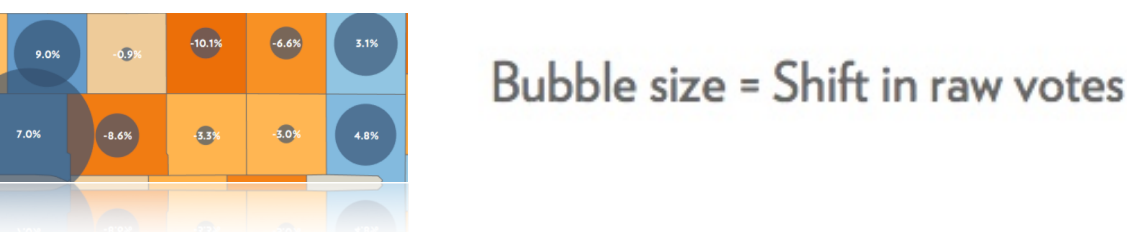

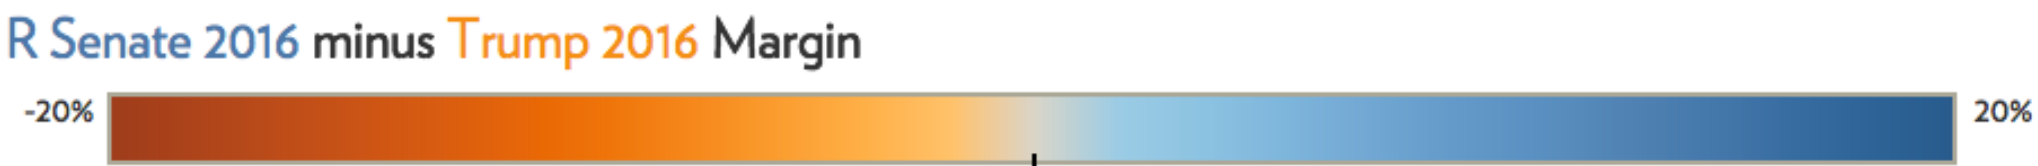

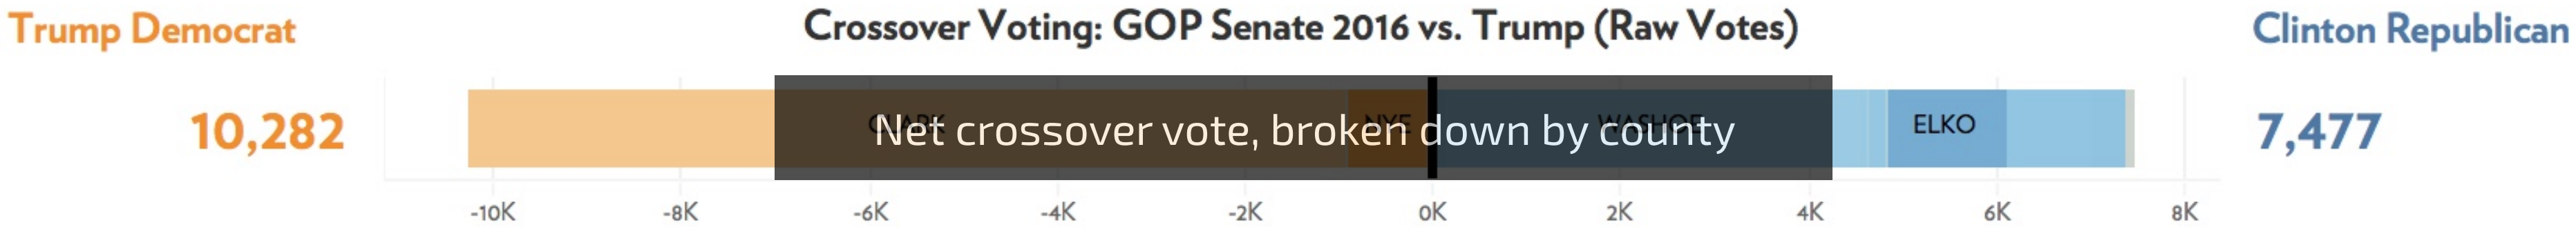

- **Donald Trump's victory redrew the map of American politics**, breaking the Blue Wall and bringing the Rust Belt into the Republican fold for the first time since 1988.
- **GOP Senate candidates in states with closely contested Senate races ran 2.2% ahead of Donald Trump.** But there were significant differences beneath the surface: In the most rural counties, Trump ran 9.8% ahead of the Republican Senate candidate, and in the most urban counties, Republican Senate candidates ran 6.8% ahead of Trump.
- **This dynamic creates opportunities and challenges** for downballot Republicans in 2018. At least some white working class voters who swung to Trump stuck around downballot, delivering Republicans the majority. But Republican Senators must continue to tend to their traditional base in suburban areas with Trump defining the brand for the next 4/8 years.
- **There is no such thing as a standard partisanship model anymore.** The supporter profile of every candidate looks different, depending on the coalition the candidate is trying to persuade. The similarity of the Presidential and U.S. Senate results masks the fact of significant split-ticket voting running in both directions, tied to the education gap.
- **This presentation maps the Trump-Senate crossover vote in all states with two-party Senate races in 2014 and 2016.** It shows the size of the "Trump Democrat" and "Clinton Republican" vote in each race, and where geographically they are located, showing the counties responsible for the biggest shift (percentage-wise and in raw votes) between Trump and Senate candidate performance.

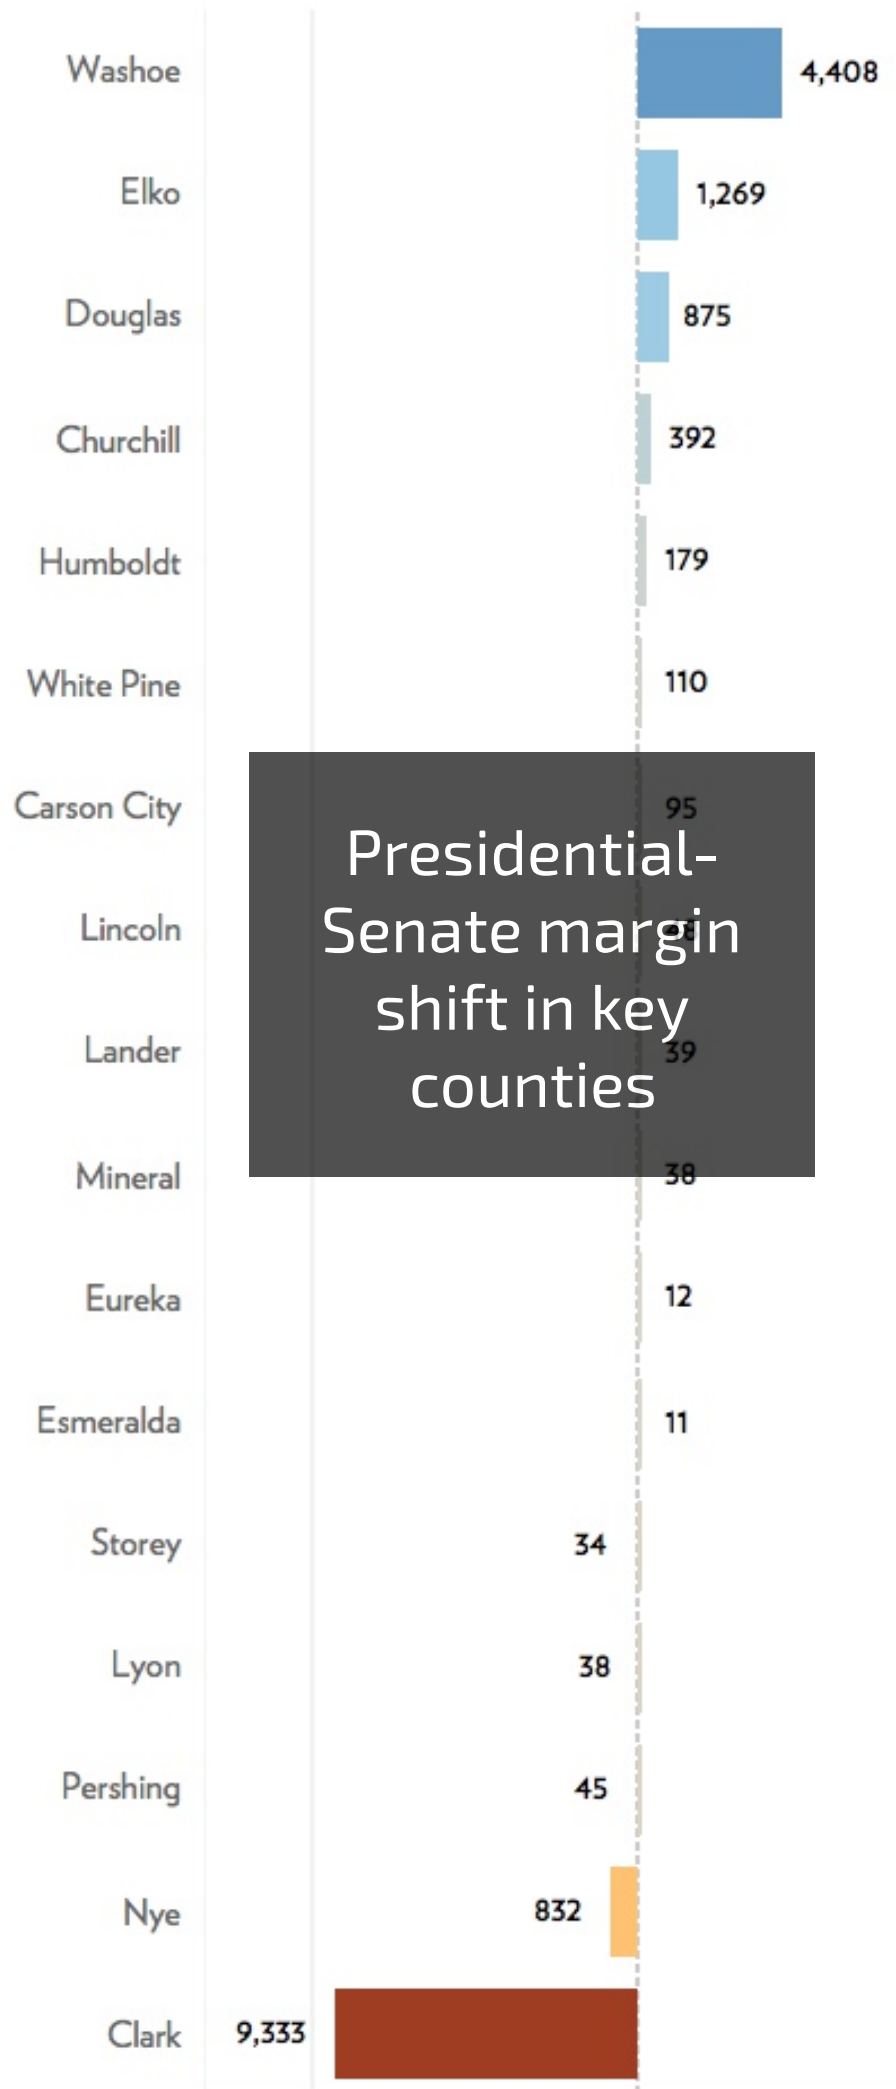

NEVADA: DONALD TRUMP 2016 VS. JOE HECK 2016 (SLIDE KEY)

Trump '16	Clinton '16	Presidential Margin '16	R Senate '16	D Senate '16	Senate Margin '16
