

DefCon Risk Group

The aerospace, defense and government contracting sector is broad with high risk and complex regulation. Claims in this area are prevalent and can also be extremely expensive to defend and pay. We have been working in this sector since our inception and have the necessary expertise to ensure our clients obtain the most comprehensive coverage to suit their unique needs.

Types of Companies

- Commercial Aerospace - commercial, regional, and business aircraft OEMs and suppliers
- Defense - defense contractors and tier I/II suppliers
- Space - rockets, launch, sub-systems, and communication providers
- Government IT and Technical Services - mission engineering to BPO to MRO and training

Key Risk & Insurance Components

- **Defense Base Act** coverage for workplace injuries is a significant exposure. Coverage applies to companies with employees working under government contracts overseas.
- “**Wrap**” around Global and / or Domestic Programs, including **General Liability, Automobile, Workers’ Compensation, Foreign Voluntary Workers’ Compensation, Umbrella, and Property** coverage.
- **Specialty Key Man** and **Life Insurance** products are commonly purchased to provide 24 hour protection for employees in high risk situations where **Workers’ Compensation / Defense Base Act** coverage is limited or the death benefits would not be sufficient.
- Tailored **Professional Liability** coverage addressing consultative or professional services provided to the government or private sector.
- Customized **Aviation** programs are often required to address companies working in the aerospace sector.
- **Nuclear Liability** is a highly specialized coverage that applies to companies that work in the nuclear sector.
- **Maritime, Bumbershoot (excess), and USL&H** coverage can be placed where applicable.
