Honeywell Turbo Technologies Settles Lawsuit With BorgWarner

Compromise reached in patent dispute through licensing arrangement

DETROIT, May 16, 2011 – Honeywell (NYSE: HON) Turbo Technologies has reached an agreement with BorgWarner Turbo Technologies to settle a four-year-old patent dispute relating to cast titanium compressor wheels used in select commercial vehicle applications.

Under the terms of the settlement Honeywell will receive a paid-up license to BorgWarner’s asserted patents in exchange for a one-time payment of $32.5 million. Other terms of the settlement are confidential.

Honeywell was prepared to defend its position at trial in the District Court for the Western District of North Carolina but felt the settlement resolving the dispute at a fraction of BorgWarner’s claim was the best solution for Honeywell and its customers. BorgWarner had sought damages of more than $100 million and asserted the award should be tripled for willful infringement.

The U.S. Patent Office has reopened examination of the three BorgWarner patents in dispute and has preliminarily found them invalid.

Honeywell Turbo Technologies is the leading automotive turbocharger developer in the world, supplying technology solutions to nearly every major automaker in the world. The Turbo Technologies business is part of Honeywell Transportation Systems, which enhances vehicle performance, efficiency and appearance through state-of-the-art technologies, world-class brands, and global solutions tailored for its automotive customers around the world.
