HANGPRO DRYWALL LIFT™

Revolutionizing The Drywall Industry For Hanging WALLS

HANGPRO DRYWALL LIFT FOR WALLS

2019 JLC EDITORS' CHOICE AWARD

FACTS

DOES THE WORK OF AN EXTRA HELPER

DESIGNED FOR SAFETY

- Over 80% of visible walls and ceilings are drywall. 2/3 of that has to be hung on walls.
- A ceiling lift is NOT a wall lift.
- Hangpro Drywall Lift For Walls is NOT a ceiling lift.
- Hangpro Drywall Lift For Walls is made for Professionals and DIY.
- Hangpro Drywall Lift For Walls allows transporting, lifting, positioning, and holding a panel in place all without an extra person.

- One (1) person can transport, lift, position, and hold panel in place.
- Only have to lift panel slightly off the floor to load on the Hangpro Drywall Lift for Walls.
- Ease of lowering and side to side movement of the panel allows for adjustment and proper placement on the wall.
- Always ready to work.
The Hangpro Drywall Lift will NOT be late, on its cell phone, or needing a break.
- Folds easily in half so can fit into an SUV.

- Ledges of the cradle are angled so panel stays securely on the lift.
- Two handles for safer transporting, positioning, and lifting.
- Casters only move side to side, which avoids the lift kicking back when lifting the panel.
- Heavy duty self-locking winch tested for a load of 150 lbs.
- Safety & operating stickers on the lift to remind operator how to safely operate the lift.
- The operator does not work below lift or panel.
- Made of 3/16th heavy gauge steel for strength & durability.
- Large rubber wheels for stability.

"The Hangpro Drywall Lift for Walls not only met but exceeded my expectations which is very rare these days when trying out new tools and equipment. Loading and transporting sheets of drywall with the Hangpro is quick, easy, and takes very little effort compared to the back-breaking effort needed to load and move drywall using my old lift. The Hangpro is like having another person on the crew who is never late and never complains no matter how hard he is worked. And, the simple but rugged design gives me confidence that it'll be on my jobsites for a long time." *Rick Arnold/ Builder/Author/Occasional drywall hanger Warwick, RI*
