

Investors Europe Internship Programmes 2010/11

Investors Europe structures 6 month internships with specific projects and responsibilities that interns will have to execute and achieve within a regulated stock broker in Gibraltar on the Iberian Peninsula. www.investorseurope.com

The usual procedure is for an intern to start by spending at least 30 working days in the Back Office/ Settlements department of the company learning about the mechanics of clearing of stocks, bonds, futures, options, CFDs, ETFs and producing client statements and sending it to the clients. Thereafter we give interns specific project(s) to execute as well as teaching them how to talk to clients and execute trades for clients as trainee Sales Traders. This involves real responsibility as they are able to talk to our clients, resolve their technical problems and even bring new clients onboard.

We are a highly focused execution-only online stock broker with the largest selection of online trading platforms in the world and, because we do a lot of our back office in-house, this gives invaluable hands-on experience to interns in real financial products. Around 90% of our interns end up working for banks, brokers and auditors with the other 10% in Sales Management areas.

Since 2001, we have had around 22 interns, most coming from the Grandes Écoles of France and we give them a formal valuation of their contribution for academic purposes and for future employers at the end of the internship. We have a Face book site which potential interns can join and talk to former interns <http://en-gb.facebook.com/interns> We strongly suggest that interns contact our interns on Face Book so the process and procedures can be explained:

Conditions for this very practical 'apprenticeship' to enter the world of Finance are:

- Free Accommodation 25 Kms from Gibraltar in Sotogrande in an apartment surrounded by the sea <http://www.spanish-fiestas.com/costa-del-sol/sotogrande-map.htm>
- Free Transport to work (car lift into work)

In terms of the culture and geography involved, the setting for the internship is unique involving UK/Gibraltar, Spain, Morocco and Portuguese cultures all within striking range even over a week end.
