This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the Scheme/Mutual Fund, due diligence certificate by AMC, Key Personnel, Investor's rights & services, risk factors, penalties & litigations etc. investor should, before investment, refer to the SAI and SID available free of cost at any of the Investor service Centre or distributors or from the website www.icicipruamc.com**

The particulars of ICICI Prudential Regular Gold Savings Fund have been prepared in accordance with the Securities and Exchange Board of India (Mutual Funds) Regulations 1996, (herein after referred to as SEBI (MF) Regulations) as amended till date, and filed with SEBI, along with a Due Diligence Certificate from the AMC. The units being offered for public subscription have not been approved or recommended by SEBI nor has SEBI certified the accuracy or adequacy of the Scheme Information Document (SID).

INVESTMENT OBJECTIVE UNDER THE SCHEME:

ICICI Prudential Regular Gold Savings Fund (the Scheme) is a fund of funds scheme with the primary objective to generate returns by investing in units of ICICI Prudential Gold Exchange Traded Fund (IPru Gold ETF).

The investments into underlying funds under the Scheme would, inter alia, be governed by:

- The investment management style of such scheme
- The tolerance and the risk profile of such schemes
- The asset allocation (such as equity or debt) of such Schemes

However, there can be no assurance that the investment objectives of the Scheme will be realized.

ASSET ALLOCATION PATTERN:

Type of Instrument	Normal Asset Allocation (% of Net Assets)
Units of ICICI Prudential Gold Exchange Traded Fund	95% - 100%
Debt & Money Market Instruments (including cash & cash equivalent and Liquid/Debt Funds).	0% - 5%

The cumulative gross exposure through its investments in various securities/instruments shall not exceed 100% of the net exposure of the Scheme.

The deviation from the underlying ETF may occur mainly on account of the receipt of cash flows which on an average takes 5 days given the existing operational procedure.

The above percentages would be adhered to at the point of investment in the underlying schemes. Further, subject to the asset allocation pattern stated above, the maximum asset allocation to the scheme of a Mutual Fund may be to the extent of 100% of the investible corpus under the Scheme.

The investment portfolio of the Scheme would reflect low volatility in the units of the underlying schemes having asset allocations in gold and in debt and money market investments.

Investment Strategy:

The scheme would endeavor to provide investment returns linked to the underlying scheme. The scheme intends to achieve its investment objective by investing in ICICI Prudential Gold Exchange Traded Funds and Debt & Money Market Instruments. The AMC shall endeavor that the returns of ICICI Prudential Regular Gold Savings Fund will replicate the returns generated by ICICI Prudential Gold Exchange Traded Fund and is not expected to deviate more than 2% on an annualized basis net of recurring expenses in the Scheme. The deviation from the underlying ETF may occur mainly on account of the receipt of cash flows which on an average takes 5 days given the existing operational procedure.

The Scheme will invest in ICICI Prudential Gold Exchange Traded Fund directly or through secondary market.

The table shows below the impact that could happen on fund performance as a result of delay in receipt of funds and consequent investments in the over previous six months ending on April 30, 2011.

Percentage difference in prices between 'n' days	2 days	3 days	4 days	5 days	6 days	7 days
Average	0.24	0.38	0.45	0.48	0.48	0.47
Maximum	4.13	4.13	4.13	4.13	4.22	4.10
Minimum	-2.33	-2.21	-2.17	-2.90	-3.13	-3.10

The assumption is that entire corpus is delayed by the no. of days tabulated above. But in reality, since the daily subscription may not be material to the total corpus of the fund the impact would not be material. Moreover subscriptions over periods of time would normally be expected to iron out the deviations.

Banking and Utilization of Funds

Status of fund realisation on lumpsum and SIP investments:

a. Banking and Utilization of Funds

Following are the various modes of payments for Purchase/Additional purchases and SIP transactions for ICICI Prudential Regular Gold Savings Fund

Sr. No.	Payment Mode	Clearing
1	RTGS	Same Day
2	Transfer Instrument	Same Day
3	Auto Debit	Same Day
4	NEFT	Same day or the next day
5	ECS	One/Two days or Five/Seven days (Depending on the clearing cycle of that particular location)
6	MICR	Two days but in some cases 3-7 Days
7	PDC	As per MICR clearing cycle of RBI/SBI

The cash flow through various modes of acceptance will be analyzed on a daily basis. Investment into the underlying units of underlying scheme would be on the basis of this cash flow analysis & subscription/redemption request received. The deployment will be carefully planned on the basis of the mode of acceptance of instrument with an objective to moderate tracking error.

To illustrate - A cheque of Rs. 10,000 received on T day in the Fund would result in the investor getting the NAV of T day in ICICI Prudential Regular Gold Savings Fund as per extant guidelines. The said cheque would be realized only on T+2/3 and hence the fund would invest in underlying scheme on T+2/3 as the case may be. There could be underlying price movements in underlying scheme between T day and T+2/3 day. This could result in tracking error. However, over periods of time it may get neutralized.

To that extent the performance of scheme shall be at variance with that of the underlying scheme.

The table below highlights the Clearing Mechanism of the funds based on various modes of payments based on different types of location for lumpsum investments:

Location/ Mode of clearing	RTGS	NEFT	ECS (RBI locations)	ECS (Non-RBI locations)	MICR (RBI locations)	MICR (Non-RBI locations)
Tier I	T day	T day upto 5.00 pm, Otherwise T+1	T+3 days	NA	T+2 days	NA
Tier II	T day	T day upto 5.00 pm, Otherwise T+1	T+3 days	T+3 days	T+2 days	T+3 days
Tier III	T day	T day upto 5.00 pm, Otherwise T+1	NA	T+4 days	NA	T+4 days
Tier IV	T day	T day upto 5.00 pm, Otherwise T+1	NA	T+5 days	NA	T+5 days

The table below highlights the % of funds received on Systematic Investment Plan received from ECS location for one SIP date 25th (for Jan 2011 - Mar 2011 period).

Period of receipt of funds from the SIP date	Jan 2011 % collected	Feb 2011 % collected	Mar 2011 % collected
T+ 2 Days	97.19	67.36	73.13
T+ 5 Days	2.81	32.63	26.87

* Online transfers denote Channel & payment gateway funds

Weighted Average of Inflows into Debt Funds is maximum 2 days.

The above data for inflow of clear funds for equity and non liquid debt schemes is for the month of April 2011. The average number of days of inflow of clear funds into ICICI Prudential Regular Gold Savings Fund may differ depending on the mode/ source of transaction.

c. Utilization of Funds

Transactions are accepted before the cut off time as specified by SEBI from time to time. All the transactions are reported in our Registrars and Transfer Agents system by the respective branches across India and funds get deposited into the banks accounts. On the basis of clear Funds being available for deployment, cash flows are reported to the fund manager on timely basis.

The inputs regarding cash flows by various modes of acceptance will be planned on a daily basis. The subscription/redemption request will also be reported and used as a basis for investing in underlying Gold funds on realization of funds. This will also form the basis for subsequent deployment of funds in underlying Gold funds. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error.

Fund Manager will either execute trade the units of underlying Gold funds on exchange or subscribe directly via AMC depending on market dynamics in the best interest of investors.

How the Scheme is different from the existing fund of funds or Gold exchange traded fund (Gold ETF) or Schemes of ICICI Prudential Mutual Fund?

In our basket of our existing schemes, we have funds like ICICI Prudential Advisors Series (fund of funds) and ICICI Prudential Gold Exchange Traded Fund (IPru Gold ETF). However we, do not have scheme which is an open ended fund of funds scheme investing in Gold exchange fund.

The Scheme is different from the existing Fund of Funds scheme and IPru Gold ETF of ICICI Prudential Mutual Fund:

- Being fund of funds scheme investing in IPru Gold ETF, it is different from existing Fund of Funds scheme which invests in Equity funds, Debt funds apart from Gold ETFs.

- The Scheme is different from existing IPru Gold ETF due to following reasons:
 - The Scheme primarily invests in IPru Gold ETF whereas IPru Gold ETF directly invests in Gold.
 - The scheme is not proposed to be listed on stock exchange and hence it facilitates the investment by investors across India who do not have demat account, to invest in this fund through physical mode. IPru Gold ETF is listed on exchange.
 - Investor can buy and sell of units of the Scheme on any business days directly with the Fund whereas in case of IPru Gold ETF buy and sell of units, other than in creation unit size, is on exchange.
 - Investors can invest in the Scheme in a systematic manner on a regular basis, through Systematic Investment Plan.

Systematic Investment Plan (SIP) is long term disciplined investment technique under investment can be made of fixed sum of money on a monthly or quarterly basis in a scheme at the prevailing NAV. This allows saving and investing regularly. This investment technique enables following benefits:

- **Small, regular investments:** A simple way to enter the market by investing small amounts. Small but regular investments go a long way in creating wealth over time.
- **Rupee cost averaging:** Fewer units during rising markets and more units during falling markets, thereby reduces the average cost per unit.
- **No need for timing the markets:** No need to select the right time and quantity to buy and sell as timing the market is time consuming and risky. It eliminates the need to actively track the markets.

- **Availability of add-on facilities:** Ease of availing add on facilities like Systematic Investment Plan, Systematic Transfer Plan, Systematic Withdrawal Plan and switch etc.

- As the Scheme is not listed on any stock exchange, investors need not depend on stock exchange liquidity to exit or redeem from the Scheme. Investing in gold through ICICI Prudential Regular Gold Savings Fund, the investor can directly subscribe/ redeem units through the physical mode at the various designated investor service centre across the country thereby making it easily accessible and convenient.

- **Cost Effective:** Investing in gold through the ICICI Prudential Regular Gold Savings Fund in physical application mode enables the investors to invest in a low cost manner as the investor does not have to incur the following charges applicable for investing through the dematerialized mode.

Example if an investor subscribing Rs 50,000/- each in Gold ETF through the dematerialized mode and Regular Gold Savings Fund through physical application would incur following charges

Charges	IPru Gold ETF through Demat Mode	ICICI Prudential Regular Gold Savings Fund through Physical Application Mode
Account Opening charges	Nil	Nil
Annual Maintenance charges of Demat Account	Rs 0 - Rs 1200	Nil
Delivery brokerage charges	Rs 25 - Rs 175	Nil
Transaction charges	Rs 25	Nil
Annual Scheme Recurring Expenses	Rs 750	Rs. 750
Total	Rs 800- Rs 2150	Rs. 750

Delivery brokerage in the above example is in the range of 0.05% to 0.35%. The above charges may vary as per different brokers. Charges like trading account opening charges, service tax, education cess, exchange levy and stamp duty is applicable on the transactions in dematerialized mode.

Annual Scheme Recurring Expenses is capped at 1.50% p.a. under both the options.

Given below is the comparison of ICICI Prudential Gold Exchange Traded Fund and ICICI Prudential Advisor Series(fund of funds scheme):

Features	ICICI Prudential Gold Exchange Traded Fund
Objective of the Scheme	The Fund seeks to provide investment returns that, before expenses, closely track the performance of domestic prices of Gold derived from the LBMA AM fixing prices. However, the performance of the scheme may differ from that of the underlying gold due to tracking error. There can be no assurance or guarantee that the investment objective of the plan will be achieved. The fund is not actively managed. It does not engage in any activities designed to obtain a profit from, or to ameliorate losses caused by, changes in the price of gold.
Investment Strategy	<ol style="list-style-type: none"> 1) The AMC uses a "passive" approach to try and achieve scheme investment objective. The scheme invests in gold as an asset regardless of such investment merit. 2) The Scheme will invest at least 95% of its total assets in the Gold or gold related securities. It may hold upto 5% of their total assets in debt or money market securities. Expectation is that, over time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. 3) The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the benchmark Index. 4) All the Investment decision will be taken by the designated Fund Manager under the supervision of Chief Investment Officer. 5) Any other strategy notified by the regulators from time to time.
Investment Pattern	Gold bullion and instruments with Gold as underlying that may be specified by SEBI - 100% - 95%; Debt & Money Market Instruments (including cash & cash equivalent)* - 5% - 0%; *Investments in Securitised debt shall be limited to the maximum exposure allowed to the debt instruments as per above asset allocation.
Average Assets under Management (As on June 30, 2011)	Rs. 103.59 crores

Risk Profile of the scheme:

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

- Investors may please note that they will be bearing the expenses of the relevant fund of fund scheme in addition to the expenses of the underlying schemes in which the fund of fund scheme makes investment.
- The changes in the asset allocation may result in high transaction costs.
- The scheme would invest in ICICI Prudential Gold Exchange Traded Fund. Accordingly, the NAV of the scheme will react to Gold price movements and as the IPru Gold ETF is listed on any stock exchange, the scheme NAV would also react to general stock market fluctuations.
- The investable surplus could remain idle before it can be suitably invested and could lead to underperformance. Similarly, to avoid liquidity shortfall at the time of redemption and dividend, the scheme could maintain some cash in the scheme which could lead to underperformance vis-à-vis gold prices.
- The NAV of the scheme to the extent invested in Money market securities are likely to be affected by changes in the prevailing rates of interest and are likely to affect the value of the Scheme's holdings and thus the value of the Scheme's Units.
- Trading in listed IPru Gold ETF may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading is not advisable. In addition, trading is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of the market necessary to maintain the listing of IPru Gold ETF will continue to be met or will remain unchanged. IPru Gold ETF may suffer liquidity risk from domestic as well as international market.
- The units of the underlying scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of holdings. The trading prices will fluctuate in accordance with changes in their NAV as well as market supply and demand. However, given that IPru Gold ETF can be created and redeemed in creation Units, it is expected that large discounts or premiums to the NAV will not sustain due to arbitrage opportunity available.
- The factors that may effect the price of gold, among other things, include demand and supply for gold in India and in the global market, Indian and Foreign exchange

rates, Interest rates, Inflation trends, trading in gold as commodity, legal restrictions on the movement/trade of gold that may be imposed by RBI, Government of India or countries that supply or purchase gold to/from India, trends and restrictions on import/export of golden jewellery in and out of India, etc.

- Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market maker of the underlying scheme to arbitrage, resulting into wider premium/discount to NAV. This could lead to fund underperformance vis-à-vis gold prices.
- The returns from underlying schemes in which the scheme invests may under perform returns from the various general securities markets or different asset classes other than gold. Different types of securities tend to go through cycles of out-performance and under-performance in comparison to the general securities markets.
- The scheme may be affected by a general price decline in the gold prices. The scheme ultimately invests in gold as an asset class regardless of such investment merit.
- An investment in the scheme may be adversely affected by competition from other methods of investing in gold.
- The Trustee, in the general interest of the unit holders of the Scheme offered under this Document and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.
- For the valuation of underlying scheme, indirect taxes like customs duty, VAT, etc would also be considered. Hence, any change in the rates of indirect taxation would affect the valuation of underlying fund(s) units and hence the Fund of Funds scheme's units.
- The Fund of funds may also invest in money market instruments, bonds, securitised debts & other debt securities or Liquid/Debt Funds as permitted under the Regulations which are subject to price, credit and interest rate risk. Trading volumes and settlement periods and transfer procedures may restrict liquidity in debt investments.
- The Scheme's endeavor is to get cash on redemptions from underlying scheme. However, in case the underlying scheme is unable to sell for any reason, and delivers physical gold there could be delay in payment of redemptions proceeds pending such realization.

- Time lag in realization of cheque/ DD and as a result investment/deployment of investible surplus will be done basis the realization in scheme account for which the performance of scheme may vary from that of benchmark.
 - The Scheme will subscribe according to the value equivalent to unit creation size as applicable for the underlying scheme. When subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed in debt and money market instruments which will have a different return profile compared to gold returns profile.
 - As the Fund of Funds (FOF) factsheets and disclosures of portfolio will be limited to providing the particulars of the schemes invested at FOF level, investors may not be able to obtain specific details of the investments of the underlying scheme. However, as the scheme proposes to invest only in IPru Gold ETF, the underlying assets will be and large be physical gold.
 - While it would be the endeavour of the Fund Manager of the Fund of Funds scheme(s) to invest in the target scheme in a manner, which will seek to maximize returns, the performance of the underlying fund may vary which may lead to the returns of the Fund of Funds being adversely impacted. Again any change in the fundamental attributes or the investments policies of the underlying scheme could affect the performance of the Scheme.
 - The scheme specific risk factors of the underlying scheme become applicable to the fund of funds as well. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme relevant to the Fund of Fund scheme that they invest in. Copies of the SID pertaining to the scheme of the Fund, which disclose the relevant risk factors, are available at the Customer Service Centres or may be accessed at www.icicipruamc.com.
 - A Fund Manager managing the scheme may also be the Fund Manager for any underlying scheme.
 - The tax benefits available under the scheme are as available under the present taxation laws and are available only to certain specified categories of investors and that is subject to fulfillment of the relevant conditions. The information given is included for general purposes only and is based on advice that the AMC has received regarding the law and the practice that is currently in force in India and the investors and the Unitholders should be aware that the relevant fiscal rules and their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor/Unitholder is advised to consult his/her own professional tax advisor.
 - **Risk associated with investment in IPru Gold ETF:**
 - a. The scheme would invest in Gold and Gold-linked instrument(s). Accordingly, the NAV of the scheme will react to Gold price movements. Units of the fund are proposed to be listed on a stock exchange; hence the market prices of the units would also react to general stock market fluctuations.
 - b. Although units are proposed to be listed on an exchange, there can be no assurance that an active secondary market will develop or be maintained. Prices of units, which are proposed to be listed and traded, could be impacted by thin liquidity in the secondary market as these funds may not be actively traded.
 - c. **Risk of passive investment:** The scheme is not actively managed. The scheme may be affected by a general price decline in the gold prices. The scheme ultimately invests in gold as an asset class regardless of such investment merit. The AMC does not attempt to take defensive positions in declining markets.
 - d. **Tracking error risk:** The performance of the scheme may not be commensurate with the performance of the benchmark index on any given day or over any given period. Such variation, referred to as tracking error may impact the performance of the scheme. However, the Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Investable surplus remaining idle increases the tracking error and hence acts as a risk factor.
 - e. Trading in units on the exchange may be halted because of market conditions or for reasons that in view of exchange authorities or SEBI, trading in units of the Scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of exchange necessary to maintain the listing of the units will continue to be met or will remain unchanged.
 - f. The units may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of holdings. The trading prices will fluctuate in accordance with changes in their NAV as well as market supply and demand. However, given that units can be created and redeemed in Creation Units, it is expected that large discounts or premiums to the NAV will not sustain due to arbitrage opportunity available.
 - g. Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV.
 - h. The returns from physical gold in which the scheme invests may under perform returns from the various general securities markets or different asset classes other than gold. Different types of securities tend to go through cycles of out-performance and under-performance in comparison to the general securities markets.
 - i. The scheme is not actively managed. The scheme may be affected by a general price decline in the gold prices. The scheme primarily invests in gold as an asset class regardless of such investment merit. The AMC does not attempt to take defensive positions in declining markets.
 - j. Gold Exchange Traded Fund are relatively new product and their value could decrease if unanticipated operational or trading problems arise.
 - k. An investment in the scheme may be adversely affected by competition from other methods of investing in gold.
 - l. The Trustee, in the general interest of the unit holders of the Scheme offered under this scheme information document and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.
 - m. For the valuation of units, indirect taxes like customs duty, VAT etc. would also be considered. Hence, any change in the rates of indirect taxation would affect the valuation of units of the Scheme.
 - n. The Fund may also invest in gold related instruments, money market instruments, bonds & other debt securities as permitted under the Regulations which are subject to price, credit and interest rate risk. Trading volumes and settlement periods and transfer procedures may restrict liquidity in debt investments..
- **Risk Mitigation Strategies:**
 - Risk Mitigation measures for portfolio volatility**

Gold ETFs being passively managed carry lesser risk compared to active management. The underlying ETF scheme(s) where the fund intends to invest follow the underlying price of gold and therefore the level of portfolio volatility would be same as that of the underlying gold price. The fund manager would also endeavour to keep minimal cash levels to keep performance deviation from the underlying ETFs to minimal.
 - Risk mitigation measures for managing liquidity**

Gold ETFs invest in physical gold which satisfy the norms of 'Good Delivery' as defined by London Bullion Markets association. Liquidity issues are not envisaged as gold is a globally traded commodity and thereby very liquid. There are also designated Authorised Participants who facilitate liquidity on the exchange.

Also the Gold ETF could have tracking error with respect to price of physical gold which may add to the schemes tracking error with its benchmark i.e. physical gold due to various factors including but not limited to:

 1. **Delay in the purchase or sale of gold due to**
 - a. Illiquidity of gold,
 - b. Delay in realization of sale proceeds,
 - c. Creating a lot size to buy the required amount of gold
 - Risk Mitigation:**
 - a. Gold is a fairly liquid asset and hence in normal circumstances would be available for purchase and sale at all points of time.
 - b. The AMC has a robust process of retrieving speedily the daily collections at various RTA locations. The RTA has been advised to bank cheques as expeditiously as possible. The AMC tracks the daily cash flows and the Fund Managers towards prompt deployment, subject to market conditions.
 - c. Even if the collections reported on a day are less than the minimum lot size, the AMC can procure the required quantity through open market purchases. The AMCs generally appoint Authorised Participants under the Gold ETF scheme to ensure liquidity in the market place for the ETF units.
 - 2. The Scheme may buy or sell the gold at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
 - Risk Mitigation:**

Investment is based on the judgment of the Fund Manager, and he would work towards furtherance of the unitholders interest.
 - 3. The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.
 - Risk Mitigation:**

Units procured through exchanges have an auction process inbuilt into them, and hence the aforesaid risk is automatically mitigated.

Even for lot size purchases, the AMC deals with multiple reputed banks/ authorized participants whereby the probability of default in trades are remote.
 - 4. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
 - Risk Mitigation:**

The fund manager would endeavour to keep cash to the minimal, subject to the asset allocation table; the fund has also proposed a minimal expenses ratio, thereby reducing the extent of tracking error.
 - 5. Execution of large buy / sell orders, and disinvestments to meet redemptions, recurring expenses, dividend payouts etc.
 - Risk Mitigation:**

These deals are done at best possible prices available at the time of investments. Distortions, if any would automatically get corrected over periods of time.
 - 6. Transaction cost (including taxes and insurance premium) and recurring expenses
 - Risk Mitigation:**

The Fund seeks to keep it to the minimal to reduce the impact of the tracking error. The AMC will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However this may vary when the markets are very volatile.
 - 7. Delay in receipt of subscription/SIP inflows
 - Risk Mitigation:**

The inputs regarding cash flows by various modes of acceptance will be estimated on a daily basis by ICICI Prudential Mutual Fund. The subscription/ redemption request will also be reported and used as a basis for planning

investments in IPru Gold ETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error.

8. Availability of Gold bars for creation of units of IPru Gold ETF

Risk Mitigation:

The Mutual Fund appoints leading bullion banks to make gold bars available for creation of underlying scheme and that in turn will help minimize tracking error.

9. Funds flows in Gold Saving funds of value lesser than Creation lot size of IPru Gold ETF

Risk Mitigation:

For small amounts of inflows/outflows which are less than the creation size of IPru Gold ETF, the FOF scheme will buy/sell IPru Gold ETF units directly on the stock exchange without waiting for additional subscription redemption to minimize tracking error.

10. The trade execution prices for IPru Gold ETF may be different from NAV of IPru Gold ETF

Risk Mitigation:

The execution price of IPru Gold ETF will be a factor of demand/supply on the stock exchange. The difference tends to average out over a longer time horizon and that will moderate tracking error.

• **Risk management strategies**

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk & description specific to debt	Risk mitigants / management strategy
Market Risk: As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	In a rising interest rates scenario the scheme will increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity will be increased thereby mitigating risk to that extent.
Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.	The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The fund will however, endeavor to minimise liquidity risk by investing in securities having a liquid market.
Credit Risk: Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.	A traditional SWOT analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower. In case of securitized debt instruments, the fund will ensure that these instruments are sufficiently backed by assets.
Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.	Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.

OPTIONS OFFERED UNDER THE PLANS OF THE SCHEME: Investors under the Scheme have the choice of Growth Option and Dividend Option at present. Dividend option will have dividend payout and dividend reinvestment facilities. Growth Option is the default option under the Scheme.

The Trustee reserves the right to declare dividends under the dividend option of the Scheme. It should, however, be noted that actual distribution of dividends and the frequency of distribution will depend, inter-alia, on the availability of distributable surplus.

The Trustee may, at a later date, decide to introduce any other options, under the Scheme, as is considered necessary.

APPLICABLE NAV FOR PURCHASE (INCLUDING SWITCHES): In respect of valid applications received upto the 3.00 pm on a business day, by the Mutual Fund alongwith a local cheque or a demand draft payable at par at the place where the application is received, the closing NAV of the day on which application is received shall be applicable.

In respect of valid applications received after 3.00 pm on a business day, by the Mutual Fund alongwith a local cheque or a demand draft payable at par at the place where the application is received, the closing NAV of the next business day shall be applicable.

In respect of purchase of units with amount equal to or more than Rs. 1 crore, irrespective of the time of receipt of application, the closing NAV of the day on which the funds are available for utilization shall be applicable.

APPLICABLE NAV FOR REDEMPTION (INCLUDING SWITCHES): In respect of valid applications received upto 3.00 pm on a business day by the Mutual Fund, same day's closing NAV shall be applicable. In respect of valid applications received after the cut off time by the Mutual Fund, the closing NAV of the next business day shall be applicable.

MINIMUM APPLICATION AMOUNT AND MINIMUM ADDITIONAL AMOUNT:

Minimum Application Amount	Rs. 5,000 (and in multiples of Re. 1)
Minimum Additional Application Amount	Rs. 1,000 (and in multiples of Re. 1)

REDEMPTIONS INCLUDING SWITCH-OUTS: The Units can be redeemed (i.e. sold back to the Fund) on every Business Day at the Redemption Price. The redemption request can be made for any amount of minimum of Rs. 500/- and multiples of Re.1/- thereof provided minimum balance should not fall below Rs. 5,000/-. The Fund reserves the right to close a Unitholder's account if the balance falls below Rs. 5,000/- and the investor fails to invest sufficient funds to bring the value of the account up to Rs. 5,000/- within 30 days. Redemption can also be made for the total number of units standing to the credit of investor at the time of closure of account, even though such redemption is for less than Rs.500/-. The redemption will be at Applicable NAV.

The Fund reserves the right to modify exit loads, at any time in future, on perspective basis. The maximum load (exit) under the Scheme will not exceed the limits as prescribed under the Regulations.

CUT-OFF TIME FOR SUBSCRIPTIONS/REDEMPTIONS/ SWITCHES: 3:00 pm

This is the time before which your application (complete in all respects) should reach the official points of acceptance.

DESPATCH OF REDEMPTION PROCEEDS: The redemption or repurchase proceeds shall be despatched to the unitholders within 10 working days from the date of redemption or repurchase.

BENCHMARK INDEX: The scheme will be benchmarked against the domestic price of gold. The Trustees reserves the right to change the benchmark in future if a benchmark better suited to the investment objective of the scheme is available.

DIVIDEND POLICY : The Trustee may approve the distribution of dividends by the AMC out of the net surplus of the Scheme. To the extent the net surplus is not distributed, the same will remain invested in the Scheme and be reflected in the NAV. It should, however, be noted that actual distribution of dividends and the frequency of distribution will depend, inter-alia, on the availability of distributable surplus and will be entirely at the discretion of the Trustee.

- k. Investors who want to make multiple nominations need to fill the separate Multiple Nomination Form available on the AMC's website www.icicipruamc.com or at any of the AMC's branch offices.

VIII. DIRECT CREDIT OF DIVIDEND/REDEMPTION: ICICI Prudential AMC had entered into an arrangement with certain banks; such as Citibank N.A., HDFC Bank, HSBC and ICICI Bank, for direct credit of redemption and dividend proceeds if the investors have a bank mandate any of the specified banks. However, the Fund reserves the right to issue a payment instrument in place of this direct credit facility, and will not be responsible for any delay on the part of the bank for executing the direct credit. The AMC may alter the list of the banks participating in direct credit arrangement from time to time / withdraw direct credit facility from the banks, based on its experience of dealing with any of these banks or add / withdraw the name of the bank with which the direct credit facility arrangements can be introduced/ discontinued, as the case may be.

IX. E-MAIL COMMUNICATION: Delivering service through the internet & web-based services such as e-mail is a more efficient delivery channel. When an investor has communicated his / her e-mail address and provided consent for sending communication only through email, the Mutual Fund / Registrars are not responsible for email not reaching the investor and for all consequences thereof. The Investor shall from time to time intimate the Mutual Fund / its transfer agents about any changes in the email address. In case of a large document, a suitable link would be provided and investor can download, save and print these documents. However, the investor always has a right to demand a physical copy of any or all the service deliverables, and the Fund would arrange to send the same to the investor. Account statements will be sent via email, by default, to investors who have provided their email ID, unless specified otherwise. It is deemed that the Unit holder is aware of all the security risks associated with online communication, including the possibility of third party interception of the documents sent via email.

X. KNOW YOUR CUSTOMER (KYC) NORMS: With effect from 1st January, 2011, KYC (Know Your Customer) norms are mandatory for ALL investors for making investments in Mutual Funds, irrespective of the amount of investment.

KYC forms are available on the AMC's website www.icicipruamc.com or at any of the AMC's branch offices.
