**Investment Objective:** The investment objective of the Plan is to seek to generate regular returns by investing in a portfolio of fixed income securities/ debt instruments which mature on or before the date of maturity of the plan. However, there can be no assurance that the investment objective of the Plan under the Scheme will be realized.

**Asset Allocation Pattern of the Plan under the Scheme:**

Type of Instrument	Normal Asset Allocation (% of Net Assets)
Central and State Government securities	0-100%
Money Market instruments, Short-term and medium term debt securities/ debt instruments and securitised debt	0-100%

*Note:* The Scheme decides to invest in securitised debt (single loan and/or pool loan securitised debt), it could be upto 50% of the corpus of the Plan. The scheme will not have exposure to derivatives.

The Scheme shall not invest in foreign securities.

The above percentages would be adhered to at the point of investment. The portfolio would be reviewed monthly to address any deviations from the aforementioned allocations due to market changes and for defensive consideration.

It may be noted that no prior intimation/indication would be given to investors when the composition/asset allocation pattern under the scheme undergo changes within the permitted band as indicated above or for changes due to defensive positioning of the portfolio with a view to protect the interest of the unitholders on a temporary basis. **Investment Strategy:** The Scheme will invest in a basket of debt and money market securities maturing on or before maturity of the Scheme. The Scheme will invest in securities with a view to hold them till the maturity of the fund. To that effect the fund will follow a buy and hold strategy to investment. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC. The credit evaluation includes a study of the operating environment of the company, the past track record as well as the future prospects of the issuer, the short as well as longer-term financial health of the

issuer. The AMC will also be guided by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and any other reputed rating agency.

In addition, the investment team of the AMC will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC would use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.

The corpus of the Scheme will be invested only in debt and money market instruments. Subject to the Regulations, the corpus of the Plan(s) can be invested in any (but not exclusively) of the following securities/debt instruments:

- 1) Securities created and issued by the Central and State Governments and/or repos/ reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).

- 3) Debt obligations of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee.
- 4) Corporate debt (of both public and private sector undertakings).
- 5) Obligations/ Term Deposits of banks (both public and private sector) and development financial institutions.

**Risk Profile of the Scheme:** Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme Specific Risk Factors summarised below.

**Scheme Specific Risk Factors and Risk Management Strategies:**

**Investments in the scheme may be affected by trading volumes, settlement periods, fluctuations in interest rates, liquidity risk, credit risk, reinvestment risk, settlement risk, regulatory risk, counter party risk and securitized debt.**

**Risk management strategies:** The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk & Description specific to Debt	Risk mitigants / management strategy
<b>Market Risk/Interest Rate Risk:</b> As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	<b>Market Risk/Interest Rate Risk:</b> The fund will invest in a basket of debt and money market securities maturing on or before maturity of the fund with a view to hold them till the maturity of the fund. While the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.
<b>Liquidity or Marketability Risk:</b> This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.	<b>Liquidity or Marketability Risk:</b> The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The fund will however, endeavor to minimise liquidity risk by investing in securities having a liquid market.
<b>Credit Risk:</b> Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.	<b>Credit Risk:</b> A traditional SWOT analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower. In case of securitized debt instruments, the fund will ensure that these instruments are sufficiently backed by assets.

Risk & Description specific to Debt	Risk mitigants / management strategy
<b>Reinvestment Risk:</b> This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.	<b>Reinvestment Risk:</b> Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.

For detailed risk factors and risk management strategies, kindly refer the Scheme Information Document.
