

iPhone™ Solar Charger™

QUICK TIPS

- ★ You **MUST FULLY CHARGE** the unit **BEFORE** use!! This conditions the battery that is inside the unit. Using the included USB cable, charge the unit from your computer for a full 5 hours.
- ★ Be sure to remove the plastic cover that protects the solar panel during shipping. (Unit will not work properly unless this cover is removed.)
- ★ Yes, there is a battery inside the unit. It will charge anytime the solar panel is exposed to sunlight – whether your iPhone is docked or not.
- ★ The unit will also charge when the solar panel is exposed to indoor lighting. However, be aware that it will charge at a much slower rate. For optimal indoor charging, use the USB cable and charge from a computer.
- ★ Sync Mode: The supplied USB cable can charge and SYNC with iTunes while the iPhone is docked in the unit.
- ★ Generation: The Surge is designed to fit and charge your iPhone 3G and 3G S
- ★ Certification: Your Surge unit and 30 pin port are Apple-Certified. The Surge is the **ONLY** solar charger available with this certification by Apple for use with your iPhone. Beware of generic and knock off units.
