

Task H.3

By Charlie Sheehan

Urbanization

- The definition of urbanization is when move into a area, and build homes, roads, shops, hospitals, parks, schools and other infrastructure.

Problems and solution

- Rubbish bins in lane ways. Council needs to ensure that businesses keep lane ways clear.
- A increase of beggars needs to be managed by mental health organisations.
- Private and public partner ships need to join forces to develop Jolimont rail yards.
- The city roads have become very congested. Greater impediments need to be installed to prevent traffic.
- I do believe these solution would work.

Lots of Combi soup kitchens to feed the hungry beggars which are open 24 hours

More mental health experts to care for Melbourne's homeless people

More city accommodation for homeless people
