

## Scrum is simple but very, very hard!

*K.Schwaber*

The South African Scrum Gathering now offers more than double what it did last year! Two days of conference with a full day of intimate workshops, allow delegates to gain a deeper understanding of the challenges they face and to explore potential solutions.

### **SPEAKERS: HENRIK KNIBERG, BORIS GLOGER, MIKE VIZDOS, ASLAM KHAN, MARTINE DEVOS, ALAN CYMENT & MORE...**

**Best of the best** - International and local Certified Scrum Trainers and Coaches will present over the two days of the Gathering, offering a wealth of experience gained working in some of the largest agile environments.

**Bigger than before** - The South African Scrum Gathering is now two days and offers more than double the content of last year, with multiple tracks and many more speakers

**Covering the important subjects** - We cover the topics that matter most to today's agile practitioners (ScrumMaster, Product Owners, Agile managers, developers, testers and analysts) including release management, retrospectives, estimation and more

**Open Space Technology** - a highly effective way to organise conferences so that every participant can maximise the value she gets from attending. The topics are proposed dynamically and interested people gather to discuss them. Around 100 topic sessions will be available during the course of day 2. Open Space is one of the most valuable ways your employees can spend their time at a conference. For more information watch [this 2-minute video](#) on Open Space at the Orlando Scrum Gathering 2010.

**Additional learning opportunities** - As well as ten tracks of great content there will be an extensive program of pre-Gathering courses as well as our "Scrum Clinic" sessions where you can book time with experts to answer your difficult questions

**Intimate workshops** - Full day workshops offer delegates an opportunity to delve deep and we've capped numbers to 40 or less, allowing more face time with the speaker in an intimate setting

**Networking opportunities** - With over 150+ like minded agilistas descending on Cape Town from all over the globe for the event, it's a great opportunity to meet new friends and forge professional contacts

Never before have South African Scrum and Agile practitioners had local access to such a variety and depth of expertise in one place. And all this at below cost, thanks to our generous sponsors including [VersionOne](#). If you want to unlock the benefits of Scrum and Agile, this conference is for you.

### **TOPICS: RELEASE MANAGEMENT, COLLABORATIVE MODELING, KANBAN & SCRUM, ADVANCED ESTIMATION AND PLANNING, RETROSPECTIVE FACILITATION, INCENTIVISING AGILE TEAMS & MORE**
