

THE ORIGINS OF OUR UNIVERSE

4.568 BILLION YEARS AGO A SMALL PART OF A GIANT MOLECULAR CLOUD HAD A GRAVITATIONAL COLLAPSE.

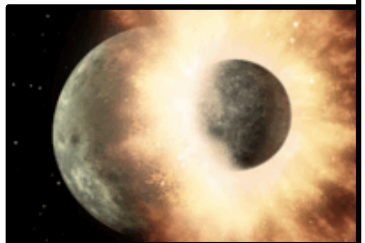

YOUR WORDS HERE...

MOST OF THE COLLAPSE WAS IN THE CENTER

THE LEFTOVER DUST AND GAS STUCK TOGETHER AND AFTER THOUSANDS AND MILLIONS OF YEARS PLANETS STARTED TO FORM

30-50 YEARS AFTER THE UNIVERSE FORMED, THE OLD EARTH WAS HIT BY A SMALL ASTEROID AND THIS MADE THE MOON

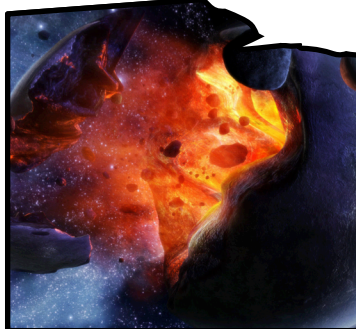

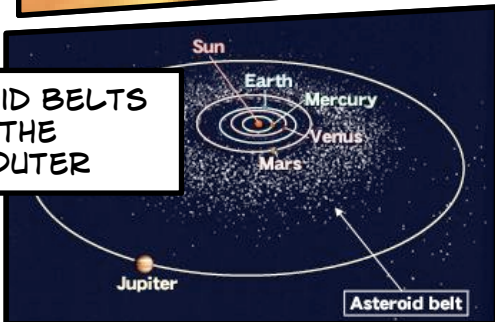

"I'M AN ASTEROID HITTING EARTH. YAAAAAY!!"

ONCE THE PLANETS STARTED TO SHIFT INTO PLACES BY GRAVITY AND THAT CREATED THE INNER AND OUTER PLANETS

THE PLANETS AROUND US SHIELDED US FROM KILLER ASTEROIDS THAT COULD DESTROY EARTH

THE ASTEROID BELTS SEPARATED THE INNER AND OUTER PLANETS

ONE OF THE ASTEROIDS PASSED BY THE PLANETS EARTH AND KILLED ALL THE DINOSAURS
