- **“L, I” Show-n-Tell:** The students love sharing their treasures and giving clues so their friends can figure out what they brought.
- We have worked in our journals writing words that each student can read and being challenged to sound out words they want to write. We will continue to encourage writing and word recognition. Thanks for your help on the home front.
- Winter seems to be here. Thanks for sending all the appropriate winter gear. This group is great at getting themselves ready with minimal help from adults. Zippers, boots on the correct feet and putting on gloves and mitts last are the challenges. Everyone is so kind to help their classmates if I am busy helping a student. Please make sure that ALL items are labeled. When we have 5 black snow pants laying on the floor it is easy to get them mixed up or 2 pairs of boots that are the same size can be difficult so labels really help. Once again thanks.
- We are busy learning songs in music and poems in our classroom to prepare for our **“Wintertime” Music program. Don’t forget to mark DEC. 21st at 1:30 on your calendar.** The gym will be packed so arrive a bit early to find a spot to sit and enjoy the program. You may visit our classroom after the program and pick up your Christmas present made for you by the students.
- We have begun talking about the season and our “K” students have a **service project** to contribute to. **We are collecting can goods and/or loose change to be donated to the FERGUS FALLS FOOD SHELF by the 16th of December.** Student elves will be collecting the food & coins daily and bringing them to our collection points. Thanks for your encouragement with this project also.
- In Science we are talking about animals, their needs and differences and habitats.
- Math: Learning our teen numbers is a challenge. If you could practice stating a number between 10-20 and having your child write the number you say. Or you could have them push the buttons on the TV remote or a calculator to show the number stated. That would be awesome or you could write the number and have your child state the number’s name.
- Practice writing their name and saying each letter’s name. Please practice the 1st letter capital and the rest of the letters printed lower case.
- Practice writing all the ABC’s and numerals 0-10
