

ColdFusion Developer

DURATION 6 months to perm
START DATE Immediate

BACKGROUND –

- This person will be reporting to the Web Development Manager who we have worked with for over seven years.
- This role will be developing our client's intranet and extranet.
- TEKsystems' client is one of the largest Healthcare providers here in San Diego. They have multiple hospitals and clinics throughout the County.

REASON FOR OPENING –

- Need to replace a developer had to move out of state for personal reasons.

JOB DESCRIPTION –

- The individual will be working on their intranet and extranet which is all written in ColdFusion.
- One of the large projects that this individual will be supporting is the patient portal. This went live about a year and a half ago and is used for scheduling appointments for patient, obtaining lab results and is secure through each doctor's office within their network.
- Looking for someone to hit the ground running.
- This individual should be well versed in software development and have an excellent understanding of the SDLC.
- Candidate will be supporting any number of projects within ColdFusion - v.8 (will be going to version 9 later this year).

SKILL OVERVIEW–

1. Strong development experience with ColdFusion (at minimum v.6.1) in an enterprise environment. (5-8 years of experience preferably recent experience with v8.)
2. Expert level understanding of the SDLC
3. Ability and experience with building web applications in an established enterprise level framework
4. In depth knowledge of Web page design, development & implementation utilizing standard tools.
5. Extensive experience using Web authoring tools.
6. Working knowledge of Microsoft IIS, ASP, SQL, SQL Server, and graphic design software.
7. Experience with Web desktop integration standards & strategies
8. Knowledge of acceptable user authentication methodologies
9. Experience with developing and maintaining database-driven Web applications

PREFERRED/DESIRED SKILLS

1. Experience using Visual Basic, Java, and Flash
2. Experience using and troubleshooting a Content Management System. (This company uses Common Spot)
3. Understanding of SOA

4. 1-2 yrs experience in deploying remote access methodologies
5. 1-2 yrs experience in Web desktop integration
6. Windows 2000/2003 Server administration

OTHER IMPORTANT DETAILS

1. Web Manager promotes a very strong culture for Web Group - good personality, sense of humor and group/team mentality
