

3 Month Internship with potential full time opportunity

Opportunity:

Looking for an enthusiastic developer to continue to build out our web application to deliver 3rd party plugins for our ecommerce and celebrity clients.

Who we are:

Liv is an online way to create lists and folders of things you want, love, and wish for. We have a working web application (livthis.com), active users who love Liv and pilot customers waiting for our plugins.

Looking For:

An eager learner who has an obsessive attention to detail and user experience, solid communication skills and passion about being part of a start up team!

Front End Expertise: XHTML/CSS/JavaScript - Hand code, standards compliant, semantic, cross platform & cross device interfaces, & jQuery.

Application programming Expertise: PHP, AJAX, Web Services (RSS, REST, SOAP, XML-RPC, etc.) and MVC Framework.

Database Expertise: MySQL – Relational database design and programming, stored procedures, triggers, reporting, and administration.

Server Expertise: Apache, URL Rewrites, security, certificates, load balancing, etc.

While experience / expertise in all of these areas is not a must, the listing should provide you a general understanding of what we are looking for.

Apply:

Include your resume, list of references, links to projects you have worked on (personal and professional), desired schedule and a quick note about why you'll make a great addition to the Liv Team.

You will be scored by your technical skills, communication skills and personal passion for the project. We are moving quickly and plan to add a competent candidate within 10 days.

Please send your submissions to jointheteam@theliv.com
