

PsyAsia International has been offering the [British Psychological Society \(BPS\) Certificates of Competence in Occupational Testing](#) as a public course in Singapore and Hong for many years. We offer the same course in-house across Asia and the Middle East. The course is facilitated by an award-winning doctor of psychology who is a joint resident of Singapore and Hong Kong. Our next public runs of this course are in August as follows:

Hong Kong

Level A: 2-4 August

Level B: 8-10 August

Singapore

Level A: 17-19 August

Level B: 22-24 August

One popular question from those interested in attending this course is:

After BPS Level A & B what psychometric tests (aptitude tests & personality assessments) can I use?

Here is our reply:

After Level A you can order and use just about any Aptitude test on the market. We market the Saville Consulting [Aptitude Tests](#) which are recognised internationally as being modern, fresh, psychometrically sound and highly predictive of performance. You would be qualified to use all of this range. Level B is slightly different. We qualify you to use the [Identity Self-Perception Questionnaire](#) (the world's most comprehensive personality test) and the [Apollo Profile Personality Test](#) (the only personality tool to compare your candidate with those rated as excellent). You can also attend the Saville Consulting Wave accreditation workshop the day after Level B at 50% off and qualify for that too. [Saville Consulting Wave](#) beat all tests it was compared to in a large validity study predicting performance and leadership. Your Level B qualifies you to use the [personality tests](#) of other test publishers whilst some may request that you undertake a one-day conversion course. Publisher requirements vary and hence we advise delegates to contact the publisher directly and ask them if Level B qualifies them to use that test. We have found over the many years we have been offering this course that most delegates prefer to stay with us and purchase tests from us given that there is nobody else in Singapore or Hong Kong with the same high level of knowledge and experience in psychometrics at work!

Previous runs of this course have been fully booked more than 6 weeks before the start, so please register early. Upon receipt of payment delegates get **immediate access to the Online Learning Centre** which contains course learning resources such as videos, forums and text-based learning.

If you'd like to register for our upcoming psychometric training courses, kindly [go here](#).
