## PERSONAL STATEMENT

I am a talented person with a great imagination for design production and a "outside the box" thinker. Pursuing a multi-media position where I can utilize my skills and creative abilities to produce a quality product!

## INTERNSHIPS

### Digital Media Designer                      New Media @ UCF

We developed a new application called the Study Hall Environment to be used in the Croquet Open Source System ([www.opencroquet.org](http://www.opencroquet.org)). The Study Hall Environment started as a story, then simplified as to storyboard and finally developed into a 3-D environment. I built the Study Hall Environment in Maya, using Photoshop/Illustrator to create all the graphical content. The final presentation presented in PowerPoint consisted of screenshots taken of the 3-D environment, an audio voiceover produced in Sound Forge and the text from the actual story.

### Designer    IEEE Conference

Created logos, flyers, schedules, maps and press documents, with original art work. Took the text based items and added graphical elements.

## WORK HISTORY

### Multimedia Designer                      Tallahassee, FL                      1/2008-Present Agency for Workforce Innovation

Extensive use of Adobe products in the layout and creation of design elements for publications, web design and applications.

Responsible for converting plain text and data into brochures, pamphlets, flyers, posters, and trade show displays. I worked with management needs while keeping the integrity of the design and brand. Printing publications requires the gathering of bids and working with vendors to achieve the best possible product. I also have experience with large-format printing for in-house projects.

In addition, I research, test, and integrate data into graphical web interfaces. ESRI, Corda, and Dreamweaver used in the creation of interactive charts, maps, and data driven web pages.

### Team Lead    Tallahassee, FL                      10/2006-6/2007 Agent Advantage/Homes.com

As a Member Services Representative I offered technical support and customer service in a fast pace environment. Assisted members with the functionality and maintenance of their website; helped optimize site for search engines, modified content for optimal lead generation and advised clients on design and layout of their sites. Resolved problematic Web Based E-Mail, Outlook and other e-mail clients. Gained a thorough knowledge of domain registry, DNS Servers and Multiple Listing Services.

### Staff Assistant    Orlando, FL                      6/2001-3/2003 DLS Consultants

Provided support services to the staff by faxing, copying, filing, data entry, mail disbursement, and telephone service. In addition, greeted and assisted visiting clients. Acted as a liaison between the corporate and field offices.

### Staff Assistant    Tallahassee, FL                      8/1999-5/2001 Dept of Juvenile Justice

I established the bureau's first website by designing the layout and graphical components. Redesigned the bureau's business cards. In addition, daily duties assisting the staff in faxing, copying, mail disbursement, telephone service and data entry.
