

a prezi now-it-on sample

For the November RA Skill Development Portfolio: November Module, you will begin by watching a Prezi presentation.

Prezi is free presentation software available at Prezi.com. Prezi is different than PowerPoint in that it is set up as a giant canvas for your presentation and not individual slides. You can design the layout however you would like. You watch a Prezi by moving forward one step at a time over a set path rather than one slide at a time.

You will find your Prezi under the Resources section.

Once you click on your Prezi you will be brought to this page.

The icon near number 1 will start the Prezi and move you forward within the Prezi.

The icon near number 2 will move you back within the Prezi

The icon near number 3 will allow you to watch the Prezi in full screen mode.

The icon near number 4 will zoom you all of the way out so you can click on different sections within the Prezi.

Prezi does use Adobe Flash Player and in order to view the Prezi you must do so on a flash enabled computer.
