

SUSTAINABILITY SYMPOSIUM

VISION TO ACTION

THE INTERNATIONAL GREEN CONSTRUCTION CODE

Friday July 20
8:30am–1:00pm

Seminar II A1105
The Evergreen State College
2700 Evergreen Parkway NW, Olympia

Olympia and other cities may adopt the new International Green Construction Code (IgCC) by 2013. It was released by the ICC in March after 3 years of public hearings and input from stakeholders and interest groups, and allows each community to tailor standards to meet their local needs and conditions.

Learn about IgCC and be part of a strategic conversation for “greening” the codes – through a Café-style discussion with local officials and leaders in business and non-profit sectors. Program begins at 9am. Coffee, tea and light refreshments will be served.

WITH

Tom Hill, City of Olympia
Building Official
And a panel of local government
and building industry experts
