**<u>Instructions</u>: Upload and activate WpStealth in your Wordpress Dashboard as you would any other plugin. Then follow the steps below to begin cloaking your links instantly.**

Step One: Enter Your Stealth Link slug. In the example above, I used "wpplugz" as my slug, and my blog is installed at http://networkwidealert.com.

Step Two: Enter the affiliate link or any URL you would like to cloak. I entered http://bestwpplugz.com

Step Three: Click "Save Links" button!

Now when users visit http://networkwidealert.com/wpplugz - they will automatically be redirected to http://bestwpplugz.com

You can edit your links at ANY time, and redirect your traffic anywhere you wish!

That's It!
