Vol 10

May 1, 2019

*From the Desk
of the Principal
Mrs. Amor*

Summer is approaching - but we don't want learning to stop! We all know the more we practice a skill the better we become. The same is true for all academic skills. The students need to keep practicing so as not to forget. The areas that can be worked on without a any difficulty are writing, reading and math. Having a regular schedule that provides structured time for each of the subject areas will show your children that you do value education and are willing to help them. In our last Newsletter for the year (June 5th) we will have list of recommended activities and websites that will be good for summer learning activities. If you are interested in summer school please check the Green Bay Schools website for what's offered at a school near your home

Sharing their Talents

The students are always willing to share their talents whether it be in sports, academics or service. A group of 7th graders has volunteered to participate in a Readers Theater performance for the St. Peter/Paul parish senior's lunch. The students will be reading "The Tiny Crooked Crack" and "Dog Jog Adventure with the Sisters". The students have taken on the challenge of directing and producing the show.

In addition to this fun activity the 7th grade students have also volunteered, when needed by the parish, for the Friday fish fries. They willingly carried tables and chairs, learned which side of the plate was the correct place for the fork, and enjoyed the cookie treat when they were finished. Parents/guardians can be proud of this group of young people they are definitely examples for all of us to follow.

Thought for the week!

" Faith is passed on by contact, from one person to another, just as one candle is lighted from another."
