The Gatekeeper phenomenon is well known among indigenous peoples. Their society depended on the gifts of the Gatekeepers, who had access to other worlds, to provide for the tribe, whether that was finding herds or reading the stars or healing their wounds. What has come forth in modern times, from two different sources (angelic and scientific), are two other levels in which Gatekeepers may choose to operate. What GW Hardin and Gregory Joseph have discovered is that anyone can tap into these worlds through their Genius-Self, allowing groups who come together to co-create and alter reality as we know it. This is the time in our history for all of us to participate in co-creating a greater world that no longer limits us.
