Microphone Boom Arms

MBA48

MBA38

MBA28

Samson's MBA28, MBA38 and MBA48 Microphone Boom Arms are the perfect microphone accessories for any radio, podcast or home studio setup. The articulating design of the MBA28, MBA38 and MBA48 provides a maximum horizontal/vertical arm reach of 28", 38" and 48" respectively, giving users convenient flexibility with their mic placement. Both models also feature internal springs that allow for silent and effortless positioning, which is ideal while recording or during live broadcasts.

With two mounting options included with each, MBA stands can be attached to a table or desk with the C-clamp mount, or more permanently fixed to a surface with the flange mount. In combination with durable steel construction, both mic boom arms offer 5/8"-27 mic clip threading that can accommodate any mic weighing up to five pounds.
