

Studiophile™ AV 30

Compact Desktop Speaker System

\$99.95
MSRP

The Studiophile AV 30 compact powered speakers make it easy to enjoy full, rich sound even when space is limited. Designed with the same critically acclaimed technology found in M-Audio's professional studio monitors, the AV 30 speakers deliver clear, crisp highs and deep lows—plus superior clarity and imaging. With a convenient front-panel volume control and 1/8" input for connecting your portable media device, the Studiophile AV 30 system is the perfect audio upgrade for desktop production systems, portable video games, personal DVD players and more.

Premium Sound—Anywhere, Anytime

Optimized for faithful sound reproduction, the Studiophile AV 30 speakers include an audiophile-grade amplifier, RCA inputs for compatibility with almost all audio products, and precisely crafted tweeters and woofers. The system also features M-Audio's proprietary OptImage™ III wave guide technology to improve detail and clarity while minimizing sound issues.

Extended Low End

The Studiophile AV 30 speakers allow you to get the most out of today's urban/dance music, movies, and video games. Unlike the "acoustically challenged" plastic found in many speakers in this price range, the Studiophile AV 30s feature dense wood cabinets, bass reflex design and an integrated bass boost switch to deliver tight, accurate low-frequency response.

Magnetically Shielded for Audio/Video Production

The Studiophile AV 30 speakers are magnetically shielded and designed to coexist with all manner of electronic equipment without interference, making them perfectly suited for video editing and multimedia work.

Features

- 3" composite woofers > *punchy lows*
- 3/4" ferrofluid-cooled silk dome tweeters > *clear, crisp highs*
- OptImage III tweeter wave guides > *exceptional stereo imaging*
- Class A/B, 15-watt-per-channel amplifier > *high-quality components*
- magnetic shielding > *designed for video editing and multimedia production*
