By mating 32-inch barrels to one of the finest competition receivers manufactured, the Sporting Clays Competition Extra is firmly established as the best value in a mid-priced over-and-under competition shotgun. This 12 gauge adds a competition buttstock and

forearm to TriBore™ System barrels, a machined steel receiver, and precision adjustable trigger. All external metal surfaces are coated with an improved carbon-fiber finish and wood is enhanced walnut or a durable matte black pigment coating.

Sporting Clays Competition Extra with 32-inch barrels

FABARM Sporting Clays Max Lion Over-&-Under Shotgun

Sporting Clays Max Lion 12 gauge with 32-inch barrels

An elite grade shotgun, the Max Lion is recognized in Europe and throughout the world as an affordable and high quality competition arm. The Sporting Clays Max Lion builds on this reputation and is distinguished by its elegant styling and sophisticated engineering; yet is no less devoted to performance, utility, and reliability in the field.

The high grade Nickel-Chromium-Molybdenum receiver is machined from a block forging using CNC tooling. It is finished by attractive color case hardening. Barrels are made using the innovative FABARM process of

shotgun achieves superior shot patterning and less felt recoil—with no decrease in shot velocity. Using just the right balance of advanced engineering technology and old world craftsmanship makes the Max Lion Sporting Clays a functional work of art. Additional features include:

- 3" chamber
- mid rib bead
- multiple internal safeties
- rebounded hammers mean no firing pins are protruding into the chamber after firing
- locking, fitted luggage case

deep drilling and honing of premium steel barrel stock.

And thanks to the patented TriBore™ Barrel System, each Max Lion Sporting Clays

- diamond-fine hand checkering on deluxe, enhanced walnut
- adjustable inertia single trigger system
- manual safety and automatic ejectors
- engraved slide plates
- anatomical "palm swell" pistol grip
- leather covered recoil pad
- lifetime warranty

USP Elite (9mm & .45 ACP Models)

USP Elite

USP and specialized models of the USP such as the USP Expert and USP Tactical. Most noteworthy is the 6.2 inch barrel, making the USP Elite the longest on all USP models—and one of the most accurate. The added length of the elongated target slide also aids the balance of the USP Elite. Significant features include the following:

- match trigger with adjustable trigger stop
- target sights with micrometer adjustment for windage and elevation

A long slide model of the USP, the USP Elite combines features found on standard sized

- hand fitted extended slide (9.45 inches) & barrel (6.20 inches) with O-ring
- extended floorplate on magazine
- loaded chamber indicator
- O-ring barrel with polygonal bore profile
- Ambidextrous control levers on both sides of the frame
- patented HK recoil reduction system
- corrosion resistant "Hostile Environment" blued finish
- corrosion proof fiber-reinforced polymer frame
- oversized trigger guard
- universal mounting grooves for installing accessories
- ambidextrous magazine release lever
- extended slide release
- extractor doubles as a loaded chamber indicator
- patented Lock-Out safety device
- lifetime warranty
